

# GARLIC MUSTARD FINAL PULL 2011

Weed Pull Event August 24, 2011

## WHAT

We were quite successful so far in decimating the infestation in Mill Creek, but there are still spots left which we want to target before this species spreads seeds.

## WHEN

Wednesday, August 24  
6:30 pm - 8:00 pm

Gardening  
tools and  
coffee mugs  
to take home!

## WHY

Garlic Mustard is a species native to Europe and Asia, originally introduced to North America as a medicinal and culinary herb. It can escape from garden plantings and invade natural habitats where it suppresses native vegetation.

Therefore, it is listed as a prohibited noxious weed in the Alberta Weed Control Act. Mill Creek is the only known location in Edmonton where this alien species occurs. To prevent further spread, it is important to act now and eradicate this infestation!

## WHERE

We are meeting at  
the corner of  
91 St / 77 Ave

## WHO

The Edmonton Naturalization Group (ENG) and the City of Edmonton are organizing this weed pull.

## GOOD TO KNOW

Garlic Mustard is easy to pull and no special equipment is needed. If you wish, you can bring knee pads and/or gloves.

If you need more information on this event please call Daniel Laubhann @ 780 423 1465!
