

paul kane park

ornamental pond study

concept option public meeting

2014.11.04

overview

- history of the project
- study process and objectives
 - input received to date
 - three design options
- questions, comments & discussion
 - next steps

project team

- city of edmonton
 - dialog
- dan euser waterarchitecture (dew)
 - sturgess architecture

project history

- existing ornamental pond
- compliance issues with new health standards
- exploration of alternatives to bring pond into compliance
 - within budget availability

Strategy

Where we are today
CONCEPT
PHASE

Design

Build

Operate

study process

- existing infrastructure review
 - public engagement
- conceptual option development
 - **public review & input**
- identification of a preferred option
 - draft and final reports
 - final public open house

point of departure

- existing pond configuration does not meet current health regulations
 - pond infrastructure is at the end of its life
- new development is required to bring the pond into compliance

what we heard

- Key themes:
 - usage
 - safety
- programming
- connectivity
 - function

what we heard

opportunity for passive programming

mature trees and green space

orientated to a broad demographic

water is key

Interaction and activity

community asset

protect existing shapes and topography

experiential

multi-seasonal usage

sound of the water

program

- develop an interactive water element
 - maintain touchable water
- expand community gathering space
 - preserve passive activity zones
- consider sight lines and park visibility
 - enhance physical site connections
- leverage paul kane house as a park asset

concept options

- illustrate program application
- combination of natural pond and interactive element
 - maintain core aspects of existing site
 - respectful of input to date
