**Attention: Mr. Rob Marchak**

600, HSBC BANK PLACE  
10250 101 STREET NW  
EDMONTON, AB T5J 3P4

Dear Mr. Marchak,

**Reference: Environmental Impact Assessment – Errata Letter**  
**Terwillegar Park Footbridge and Recreational Trail,**  
**Within Portions of 3-, 10-, 11-, 14-, and 15-52-25 W4M Edmonton, Alberta**

Please note that an error has been found within the Environmental Impact Assessment (EIA). Two locations within the EIA indicate the total length of trail construction as 7 km when in fact the actual length should read as 5.4 km. The first instance of this error can be found within paragraph 1, line 4 of the Executive Summary. The second instance of the error is found within Paragraph 1, line 3 of Section 1.0.

The actual trail construction length of 5.4 km was used in calculating the project footprint and all other metrics used to assess the project impacts. Therefore, this error in the text of the document does not affect the environmental impact analysis, mitigation recommendations, or any other aspect of EIA document in any way.

Regards,

**STANTEC CONSULTING LTD.**

A handwritten signature in blue ink, appearing to read "KF", with a stylized flourish at the end.
