

Second Nature Agricultural Compost

1.25-1.25-0.5

Plus 2% sulfur

Continue improving your soil physically, biologically and nutritionally in between Nutri-Gold applications. Replace 75% of your chemical fertilizer with Second Nature compost.

The City of Edmonton distributes Nutri-Gold and markets Second Nature agricultural compost, a nutrient and organic matter-rich compost great for building and maintaining soil health.

What makes compost a successful crop input product?

- Supplies nutrients and increases organic matter
 - Improves soil while reducing chemical fertilizer additions (supplies NP&K, calcium, sulfur and more)
 - Increases water holding capacity, reduce irrigation requirements (over time)
 - Supplies beneficial soil microbes and provides food for their proliferation
-
- Apply Second Nature agricultural compost in the spring or fall
 - Great for use on all cropland: grains, oil seeds, forage land, etc.
 - Two-year payment plans for product and its application are available
