

Outdoor Wheeled Waste Bin Enclosure Configurations

Note - Measurements denote internal working space

Screening (if Required - see Section 55.4(4) of the Zoning Bylaw)

*IMPORTANT

Use of wheeled bins require frequent snow shovelling in winter months by site owners/property managers to ensure unobstructed movement of bins. An acknowledgment letter may be required.

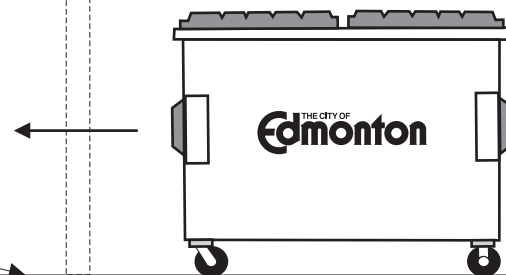

*IMPORTANT - Wheeled bins and City back lanes

Due to potential for obstruction issues in winter months caused by snow and ice accumulations the City of Edmonton will not service wheeled bins from back lanes (i.e. City roadways).

Max. Bin rollout distance - rollout distances are not greater than 9.1 metres (30 feet) indoors, 6.1 metres (20 feet) outdoors.

Transition from waste storage area to service area should be smooth and at grade with no lip or curb.

For safety reasons the maximum size bin the City allows with casters is 4 cubic yards.

In case of any conflict between information expressed in Metric and Imperial units, Metric shall govern.

Note - drawings are not to scale
