

# EPark Starting and Ending Parking Sessions

Using the app...

Step 1) Login into your MyEPark app or into **m-epark.parkplus.ca**, confirm the zone you wish to park in. You should then see the Success message in green displayed near the top of your phone screen.

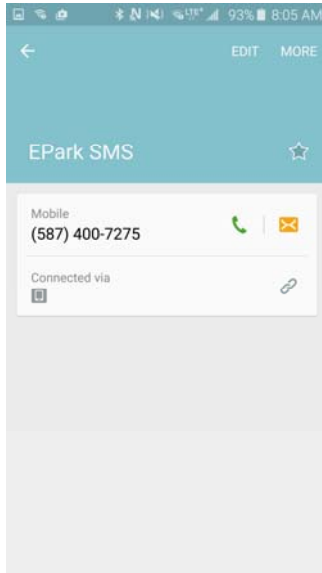

Step 2) Press the “End” button and then confirm that you wish to end your parking session. You should then see the Success message in green displayed near the top of your phone screen.

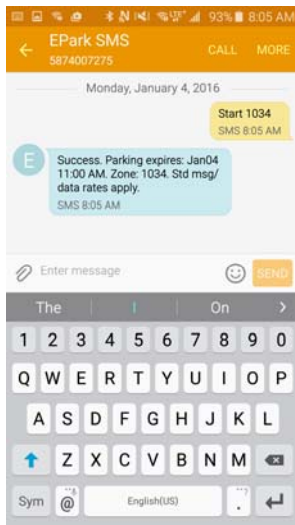

Using the text-to-park...

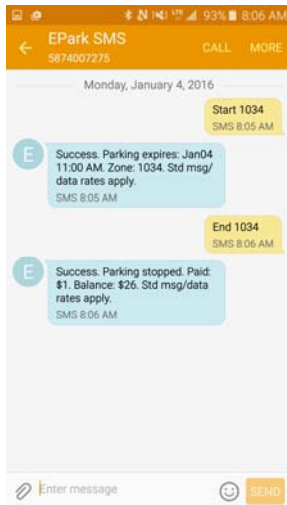

Step 1) It is recommended that you first add a contact in your phone for EPark so that you can easily reference the text-to-park phone number as part of your text messaging conversation. See below for an example...

Step 2) Start your parking session for a selected zone by entering "Start" followed by a space and then the desired EPark zone number.

Step 3) End your parking session by entering "End" followed by a space and then the active parking zone number.

Please note that you must receive “Success” text messages in order to be sure that your texts have been properly processed by the system. If errors with your phone or cell phone service providers are encountered, these messages will not appear and you should not presume that text-to-park has worked.
