

# BUILDING GREAT NEIGHBOURHOODS

## CROMDALE TRAIL IMPROVEMENTS

### Construction Bulletin

Building Great Neighbourhoods includes investments under the Drainage Renewal Program, Neighbourhood Renewal Program and the Great Neighbourhoods Capital Program.

As part of the Great Neighbourhoods Capital Program in Cromdale, contractors will be completing trail improvements in the River Valley on City property. You may have already seen some construction fencing, trail closures and the contractor's personnel in the area.

The trail improvements took into account feedback we received from the Cromdale Building Great Neighbourhoods open houses held in 2013 and 2014.

***Construction has commenced and is expected to be completed by the end of July (weather permitting).***

#### **Scope of work:**

Trail improvements from 82 Street connecting Jasper Avenue to the shared use path in Dawson Park in the areas shown on the drawing below. Improvements include 1.5m width granular trail and upgraded trail entrance feature.

#### **Access:**

The contractor will be accessing the construction areas from Jasper Avenue as well as from Dawson Park at the bottom of the trail. Portions of the trail will be fenced and closed during construction. Please respect all trail closures.

#### **Please retain this bulletin for contact information.**
