Attention: ETS Programs Administrator

Dear

Alberta Health Services is proud to be a partner in the ETS@Work Program. Since the beginning of our partnership in the summer of 2008, the number of our employees participating in this program has nearly tripled; we now have nearly 2,000 employees at more than a dozen Edmonton-area locations who regularly purchase a monthly ETS pass through this program.

Supporting green commuting alternatives such as public transit is not only a benefit to our employees, it demonstrates Alberta Health Services' commitment to environmental sustainability and the health and wellness of all Albertans.

Alberta Health Services congratulates the City of Edmonton on the success of the ETS@Work Program, and encourages other Edmonton-area employers to discover its benefits.

Sincerely,

David Poole
Director, Parking Operations
Alberta Health Services
