Information and Detour Guide Signs

Signs are necessary for controlling, warning or guiding traffic through or around a work area. Signs shall be mounted approximately at right angles to and facing the flow of traffic. Each sign shall carry one message. Signs must be placed such that the message is clear. Information signs are required for major road closures and major road work.

Signs to be used after daylight hours must be made of reflective material. Illustrations of the various signs have been provided on the following pages.
