DEVELOPMENT PERMIT CHECKLIST

If you’re using an existing retail space, complete the following:

- Commercial Development Permit application form
- Letter of Authorization (if applicant is not the property owner)
- Fees

REQUIRED PLANS AND DOCUMENTS

- Certificate of Title (no older than 90 days). Property Owner Authorization MUST match the listed ownership on Title
- Print colour photo of the existing storefront taken directly in front of the store (if the proposal does not intend to change the exterior in any way
- Site Plan (1 Set – 11x17) – It is recommended that a drafts person, architect, or planning professional design your plans. Plans must be to scale and dimensioned showing:
  - North Arrow
  - Municipal Address (+ unit or bay number) and Legal Description (Lot, Block, Plan Number)
  - Site Boundary
  - Location and size of all Buildings, and specific location of the Bay with the subject building that the Use will occupy.
  - Identification of all streets and lanes abutting the subject site
  - Parking areas and number of stalls. Provide layout and dimensions of stalls.
  - Identification of all Uses (i.e. other businesses)
- Floor Plans (1 set – 11x17) – To scale and dimensioned showing:
  - Layout of interior and exterior walls and identification of all proposed/existing room uses on all floors, including mezzanine (i.e. point of sale area, office area, delivery area, shipping / receiving area)
  - All doors, stairs and window locations
  - Dimensions of building and floor area

If your proposal includes alterations to the exterior, you must also provide:

- Elevations (1 set – 11x17) – To scale and dimensioned showing:
  - Exterior of all sides of the proposed change, including all windows, doors, loading bays, projections, decorative elements, and exterior lighting
  - Any rooftop equipment that may be part of the alteration
  - All finishing materials indicating:
    - Exterior materials (i.e. brick, stucco)
    - Roof materials (i.e. asphalt shingle, concrete tile)
    - Fascia, soffit, and trim
    - Colours of all major exterior building materials
  - Height from Geodetic Grade Elevation (dimensioned) as defined by s.6.1(40) and s.52 of the Edmonton Zoning Bylaw
  - Cross sections showing all materials used for the structure
  - Solar energy systems (if applicable).

NOTE: Additional information may be required at the discretion of the Development Officer. This may result in a longer review period. Examples:

- Parking layout and dimensions of stalls
- Floor Area for other businesses
- The Development Officer may require additional information such as lighting, signage, etc.

NEW CONSTRUCTION OR ADDITIONS TO EXISTING BUILDINGS (DEVELOPMENT PERMIT)

- Completed Commercial Development Permit application form
- Letter of Authorization (if applicant is not the property owner)
- Commercial / Industrial Checklist
- Fees
COMMERCIAL FINAL PERMIT CHECKLIST

An acceptable building permit application package consists of the following:
- Fully completed Building Permit Application Form
- Fees, based on construction value and all trades permits required for the work

PLANS, DOCUMENTS AND DETAILS

- Site plan clearly showing where work is proposed, as submitted for the Development Permit
- Drawing(s) showing:
  ‡ existing conditions in the space that is to be occupied
  ‡ all proposed building, HVAC, plumbing, gas and electrical work
- Structural and Engineering Documents, where stamped designs are required:
  ‡ structural changes to building or space
  ‡ mechanical changes to HVAC, plumbing or gas systems
  ‡ electrical changes to electrical systems
- Supplementary documents and details:
  ‡ signed/sealed required professional schedules, if applicable
  ‡ Energy Efficiency Checklist and Details, if applicable
  ‡ Construction Site Fire Safety Plan, for space under time of construction

BUSINESS LICENCE CHECKLIST

- Completed Business Licence application form
- Corporate Registry Search (corporate applicants only)
- Cannabis Suitability Email from AGLC (if available)
- Fees

AGLC LICENCE APPLICATION CHECKLIST

(For your information only. Not required for municipal approvals)

- Non-refundable application fee of $400 and licence fee of $700.
- Application for Retail Cannabis Store Licence (Form 8000)
- Particulars of Individual (Form 8005) completed by all directors, shareholders, officers and the proposed manager.
- Floor plan of the premises. Floor plans may be blueprints, architectural drawings, or a line drawing by hand. If the applicant is providing a line drawing, the floor plan must be of high quality and clearly legible. The drawing must include measurements.
  ‡ Entrances and Exits
  ‡ Walls
  ‡ Dimensions/Square Footage
  ‡ Location of Shelving
  ‡ Point of Sale Area
  ‡ Office Area
  ‡ Delivery Area
  ‡ Shipping/Receiving Area
  ‡ Proposed Camera Placement and area of coverage
- A site plan of the surrounding businesses. Site plans may be hand drawn but must be of high quality and clearly legible.
  ‡ Detailed Site Plan of Surrounding Businesses
  ‡ Other Business Name(s) (if vacant, please state)
  ‡ Geographical Directions (i.e., North, South, East, West)
  ‡ Location and Names of Surrounding Roadways
  ‡ Parking Areas
- Signed offer to lease.
- Particulars of Incorporation of Company (Form 8004).
- Particulars of Shareholding Company (Form 8004) if applicable.
- Certificate of Incorporation. Acquisition of Cannabis Products (Form 8010)
- Cannabis Licensee Acknowledgment and Undertaking (Form 8012)
- Separation of Business (Form 8008)
- Provide to Licensing in a sealed envelope addressed to Due Diligence, the below Items:
  ‡ Deposit of $3,000
  ‡ Applicant Disclosure (Form 8015)
  ‡ Associated Applicant Disclosure (Form 8016)
  ‡ Personal Disclosure (Form 8017)

Only applicants that have submitted all the required items listed above will be reviewed for eligibility. If the application is deemed eligible, the remaining items must be submitted prior to an AGLC licence being issued.
- Executed copy of the lease agreement or certificate of title, in the name of the applicant.
- Approved Development Permit
- City business licence or written approval of the municipality.
- Fire approval/Right to occupy

- Addition to Existing Building (must complete Section C7, C9 of this form)
- Exterior Alteration
- Interior Alteration
- Demolition
- Other
- Change of Use (must complete applicable portions of Section D of this form)
- Solar Energy Systems – Thermal or Photovoltaic (PV) (must see Solar Energy Systems brochure for submission requirements)

### Applicant/Owner Information

**5.** As the applicant I affirm:

- I am the registered owner of the above noted property
- I have entered into a binding agreement to purchase the above noted property with the registered owner[s].
- I have permission of the registered owner[s] of the above noted property to make the attached application for a Development Permit.

**6.** Applicant Information:

- Last Name: Chen
- First Name: John
- Business Name: Bud Brothers
- Contact Name (if different from above):
- Email: John@budbrothers.ca
- Mailing Address: 246 Def Avenue NW Edmonton AB
- City: Edmonton
- Prov.: AB
- Postal Code: B1B 1B1
- Telephone:
- Cell Ph.

### All New Buildings and/or Additions to Existing Buildings

**7.** Detail the proposed use of the new building/addition:

**8.** Total Site Area (sq. m.):

**Total Floor Area (sq. m.), including all floors and mezzanines:**

### Additions to a Commercial/Industrial Building:

**9.** Existing Floor Area (sq. m.):

**Proposed New Floor area (sq. m.):**

### Multi-Unit Residential Developments:

**10.** Total number of Dwelling Units Proposed:

**Number of Main Floor Dwelling Units Proposed:**

### Commercial Portion of New Mixed Use Building:
### D Change of Use within a specific building

11 Detail what the previous business activity was and what the previous business name was:

- **Hair Salon - Mary's Hairstyles**

12 Detail what the proposed business activities will be within the building (e.g., insurance office, steel fabrication plant, jewellery sales):

- **Cannabis retail
  - sell cannabis accessories**

13 Detail any proposed business activities that will occur outside of the building (e.g., outdoor storage of pipes, outdoor trucking yard, outdoor display of goods):

- **None**

14 **Total floor area of business (sq.m.): 195**

15 **Office space (sq.m.): 12**

16 **Warehouse space (sq.m.): 30**

### E Eating and Drinking Establishment Uses

15 Check all that apply:

- [ ] Restaurant
- [ ] Specialty Food Service
- [ ] Bar and Neighbourhood Pub
- [ ] Night Club
- [ ] Brewery
- [ ] Winery
- [ ] Distillery

16 **Public Space floor area (excluding kitchens, office areas)**

17 **What will be the maximum seating capacity?**

18 **If yes, what is the seating capacity of the outdoor patio? (a floor plan is required on the site plan)**

### F Vehicle Oriented Uses (New and used Automotive Vehicle Sales)

18 Vehicle Oriented Uses, including Automotive Vehicle Sales involving the placement of sales trailers on site is considered new Commercial development and not a change of use, and therefore shall meet the drawing and information requirements of the Commercial/Industrial checklist.

### G Applicant Declaration

19 I confirm by my signature below that the information contained in this application, including plans and details, is to my knowledge, true and complete;

Development Permit Information and Drawing Requirements

A separate Checklist form, which identifies the drawings and detailed information required for your proposed development, must be completed:

- Commercial/Industrial Checklist for new buildings and additions, exterior alterations;
- Multi-Unit Stacked Residential Checklist for 3 or more dwellings, additions, exterior alterations;
- Change of Use Checklist.

***To minimize delays in processing your application, the following must be completed and returned to our office:

- The Development Permit Application form
- The appropriate Checklist
- "The Abandoned Wells Confirmation Form – Proposed Development" with a printout of the map that was used to confirm the absence/presence of abandoned well(s).

To link to the City’s website for the Commercial Development and Building Application Form and Checklists, go to: www.edmonton.ca/currentplanningforms

Additional drawings or information may be required as considered necessary in accordance with the Edmonton Zoning Bylaw and by the Development Officer.

Applications may be subject to additional on and off site fees associated to the proposed development such as Lot Grading fee, Sanitary Sewer Trunk Charge, Transportation infrastructure fees.

Should you have any questions regarding development application requirements, please contact a representative at our Customer Information Centre at 311 or outside Edmonton 780-442-5311.

*This is NOT a Building Permit application.
A separate application must be made if a building permit is required.
**Note**: This form must be 1) signed by the applicant at the time of Development Permit application, and 2) submitted with a printout of the map(s) that was used to confirm the absence/presence of abandoned well(s).

**If an abandoned well(s) is present within the site of proposed development:**

I, **[Name]**, have reviewed information provided by the Energy Resources Conservation Board ("ERCB") as set out in ERCB Directive 079, *Surface Development in Proximity to Abandoned Wells*, and can advise that the licensee(s) responsible for all abandoned wells within the site of proposed development has been contacted in order to have the Abandoned Well Locating and Testing Protocol completed in accordance with ERCB Directive 079. To prevent damage to the well, a temporary identification marker will be placed on abandoned wells prior to construction, according to the confirmed well location(s) on site. The site of proposed development contains the following abandoned well(s):

Why do I need to disclose information about abandoned wells on my parcel?

New Requirements

Effective November 1, 2012 the Subdivision and Development Regulation (Alberta Regulation 160/2012) has changed. The changes relate to the Subdivision and Development requirements around abandoned well sites. The new provisions require some changes to our business practices. In addition to our current application submission requirements, all new Development Permit and Subdivision Applications must include the following:

Development Permit Application

An application for a development permit for a new building that will be larger than 47 square meters, or an addition to or an alteration of an existing building that will result in the building being larger than 47 square meters, must include:

- Information provided by the Energy Resources Conservation Board (ERCB) identifying the location or confirming the absence of any abandoned wells within the parcel on which the building is to be constructed, or, in the case of an addition, presently exists.
- This information can be obtained by either contacting the Energy Resources Customer Care Centre at 1-855-297-8311 (toll free) or using the GeoDiscover Alberta Map at: [www.geodiscoveralberta.ca](http://www.geodiscoveralberta.ca) to confirm whether an abandoned well is located on your property.

  - If you **do not have an abandoned well site on your property**, you must fill out the “Abandoned Wells Confirmation Form – Proposed Development” and provide a copy of the map that was used to confirm the absence of abandoned wells on your property. This information must be included with your development application.

  - If you **do have an abandoned well on your property**, you must first meet the requirements as set out in ERCB’s Directive 079 before you can apply for a permit. Once ERCB’s Directive 079 requirements have been met, you must fill out the “Abandoned Wells Confirmation Form – Proposed Development” and include a copy of the map used to confirm well location(s) with your development application.

The information is not required if it was submitted to the same development authority within the last year.

The following links provide further information on the added provisions.

I, ______________, affirm by my signature below that

1) the information contained in and with this application for building permit— including drawings, documents, details, specifications, professional schedule letters and supporting information, and any Energy Efficiency Compliance requirements of ABC2014-8.9.36 or NECB2011— pertain to the project that is the subject of this application and is, to the best of my knowledge, true and complete;

2) the PROPERTY OWNER (person, partnership, condominium, corporation, or other) is aware of and has authorized this application for building permit;

3) I am aware that no work on this project is authorized before the building permit is issued.

THIS IS NOT A PERMIT

Signature of PROJECT APPLICANT

Date

Submit only application form pages 1 and 2 with one copy of drawings, documents and details (as applicable) and fees. Retain the guide for future reference.
GUIDE TO COMPLETING Short-Form COMMERCIAL BUILDING PERMIT APPLICATION

- This Guide explains the meaning of the questions on the SHORT FORM COMMERCIAL BUILDING PERMIT APPLICATION, and provides additional background to help you provide correct information to us, so that Permits may be issued without undue delay.
- Numbers in this Guide margin correspond to margin numbers on the SHORT FORM COMMERCIAL BUILDING PERMIT APPLICATION.
- If you do not understand the questions, turn to a knowledgeable person such as your contractor, designer, or professional.
- One copy of all plans, documents and details only is required.
- The plans, documents and details are to be prepared by a person skillful in technical drawing, draftsperson or architect.
- The preferred scale of 3/16"=1'-0" or 1:75 and the minimum scale of 1/8"=1'-0" or 1:100.
- Either metric or imperial units of measurement are acceptable, however please be consistent.
- The plans, documents and details are to be prepared by a person skillful in technical drawing, draftsperson or architect.
- Incomplete application may be refused or will delay permit processing.

1. PROJECT MUNICIPAL ADDRESS is the street address of the project location, and cannot be an intersection designation only. Provide the full address description of the building, with any building name, and correct doorway, CRU or suite identifier, so that we can accurately locate the project. If uncertain, verify this with the building owner/manager.

2. DESCRIPTION OF PROPOSED WORK is a plain-language explanation of the type of proposed work, such as “To construct interior alterations for a retail cannabis store; Suite #243, Northside Shopping Mall. Partitions, store room, new barrier-free washroom” Indicate pre-packaged merchandise only, open samples, sales from open bulk containers, and so on.

3. PROPOSED WORK is an indication of all applicable and related elements of the project, such as:
   - Interior Alteration—construction, demolition or change to any part or thing entirely within an existing building.
   - HVAC—is all the systems and equipment for heating, ventilation and air-conditioning services within a building. Each tenancy (suite) must have individual control over temperature, so if subdivision of a space is planned you need a plan for controls, ducting changes, new furnace, boiler or rooftop unit, combustion and ventilation air, etc for whatever applies to your space.. Consult an HVAC specialist for small changes, or use a mechanical engineer when the total affected area is over 500 sq m.
   - Plumbing—is the drainage, venting and potable water systems within and around a building and between buildings on a property. If new sinks, washrooms or other facilities are going to be constructed or piping in the walls or under floors changed, then plumbing permit will be needed.
   - Gas—is the natural gas works system downstream of a primary supply meter within and around a building and between buildings on a property. Fuel supply piping to any new appliances and appliance replacement will need a gas permit.
   - Electrical—is the work and equipment related to electrical installations within a building, between buildings or beyond a building to a connection to a distribution, generation or renewable energy system. Like the other compulsory trades—HVAC, plumbing and gas—a separate permit for electrical work will be required for new receptacles, lighting and so on.
Change of Use—of part or all of a building—even where no construction work is planned—generally calls for current Building Code requirements and standards to be met, particularly in regards to building accessibility, life-safety and structural characteristics. Complexity of a “Change of Use” project depends on the existing building as well as the proposed Use: for example, “Change of Use” from retail to office is generally straightforward, while “Change of Use” from single detached house to retail may be far more complicated.

Exterior Alteration—construction, demolition or change to any part, thing or appearance on the exterior surface of or on a building. Changing siding or other exterior claddings requires plans review. See Hoarding (next).

Hoard—rd is a fence, covered way, guard, railing, boarding, barricade, walkway or any other structure, material or equipment placed on public lands—roadway, boulevard, sidewalk or alley—in conjunction with an On-Street Construction and Maintenance (OSCAM) permit. Very short-term work, as determined by NETWORK OPERATIONS/PARKS AND ROADS SERVICES/CITY OPERATIONS, may not require a Hoarding Building Permit. Construction materials, waste, equipment, activities or accessories related to the project located or occurring on any public lands constitutes use or occupation of public property; this may only occur with written permission from the City.

To apply for a Hoarding Building Permit, see the separate information at the end of this Guide.

4 CITY FILE # is the associated Development Permit Number of the business, obtained before the Building Permit is processed. LAST KNOW BUSINESS provides our office one more way to check that the location of the proposed business aligns with our records. Addressing must match City records, not numbers that may have been adopted by a previous tenant.

COST OF CONSTRUCTION for the project is project price tag less the following, as applicable to the particular project: costs for land, landscaping, parking lots on grade, curbs, access roads, sidewalks or other site development not related to the building structure; furnishings or appliances or other non-fixed appurtenances; interior window coverings; process equipment not required for building services or regulated by the Safety Codes Act; temporary service connections such as power for contractor use; insurance or bonding, interim financing, permit fees, professional consulting fees, GST.

5 PROJECT APPLICANT is the person, or company with responsible contact person name. PROJECT APPLICANT will be the Building Permit holder—assuming primary responsibility for the work and completion of the permit conditions.

PROPERTY OWNER means a person who
(a) controls the property under consideration,
(b) holds themselves out as the person having the powers and authority of ownership or who, for the time being, exercises the powers and authority of ownership,
(c) is registered under provincial legislation as the owner of a freehold estate in possession of land, or
(d) has purchased or otherwise acquired land, whether they have purchased or otherwise acquired the land directly from a previous owner or from another purchaser, and have not yet registered their ownership.

The OWNER is responsible together with the constructor for activities on the construction site, and is ultimately responsible to ensure that all activities that take place on the site meet the requirements of ABC 2014 and all related Codes and Standards.

CONSTRUCTOR means a person who contracts with an owner or their authorized agent to undertake a project, and includes an owner who contracts with more than one person for the work on a project or undertakes the work on a project or any part thereof. The constructor shall ensure that
(a) precautions are taken to safeguard the public and protect adjacent properties,
(b) the methods used in demolition or erection are safe, and
(c) the material and equipment used on site meet the requirements of this Code.

<tbody>
<tr>
<td>8</td>
<td>The <strong>PROPERTY OWNER</strong> or agent is best equipped to provide you with the PLAN(s) and AREA values called for in this <strong>Box 8</strong>. <strong>SITE PLAN</strong> will clearly show the project location—building, bay or suite, often with any associated parking and access routes if the building does not front directly onto a street. The site plan provided for the Development Permit should be adequate. <strong>KEY PLAN</strong> details the tenant names/addresses of any and all other bays, doorways or suites in the building, and pinpoints the location of your project. The plan provided for the Development Permit should be adequate. <strong>SITE PLAN and KEY PLAN</strong> may be combined. Those submitted for the DP should be adequate for building permit processing. <strong>BUILDING AREA</strong> is the area of the “footprint” of the building in which the project will be located (and not to be confused with floor area). Building area together with the answers to be provided in questions 14-22 inform us as to what needs to be checked to verify that the project meets the intent of ABC 2014, so permits for the work may be issued. <strong>AREA of WORK</strong> in the project is the area to be worked on—sometimes expressed as the “affected” area of work. This dictates when an architect or engineers must participate in the design and construction due to size. Most small interior alteration projects are done without involvement of a design professional except by choice. Where there is a level of complexity in a design that cannot be assessed by plans examiners, a professional will be required regardless of affected floor area.</td>
</tr>
</tbody>
</table>
| 9    | **ARCHITECTURAL WORK:** Architectural work refers to designs, graphic representations, plans, drawings, detail drawings or specifications for the project, but does not include engineering work.  
- Ensure all proposed security measures (slide-bolts or bars on exit doors, mag locks, etc.) are fully detailed on drawings.  
- Washroom facilities available for use by occupants of your space but not found within it must be shown on the floor plans. Provide letter from building owner/agent that these washrooms are available at all hours of operation of your premises.  
- **Barrier-Free Provision Notes:** Required in new construction, change of use, or major alterations involving areas subject to barrier-free construction requirements (ABC 3.8.2.1). This creates an inclusive built-environment for everyone, including persons with physical, sensory and/or cognitive disabilities, and the elderly. Barrier-free is not only a design that cannot be assessed by plans examiners, a professional will be required regardless of affected floor area.  
- When the project requires professional involvement, you must provide **A1 and all A2,B1,B2 schedules** duly completed by professional and owner; schedules not completed in all appropriate sections are not valid. See ABC: DivC 2.4.  
- Provide drawings of all proposed building, HVAC, plumbing, gas and electrical work, in the order listed in **Boxes 9 to 13**.  
- Provide sketch(es) of existing conditions in the space to be occupied, so we know what is to be changed and what remains.  
- **ARCHITECTURAL drawings**—Are the floor plans, elevations, sections, etc., signed, dated and sealed by an architect?  
- No→ the project AREA of WORK is not more than 500 sq m, on all floors, mezzanines, occupied rooftop or courtyard.  
- Yes→ an architect or licensed interior designer has signed, dated and stamped the work.  
- **ARCHITECTURAL schedules**—Are professional schedules required from the architect responsible for the architectural design?  
- No→ not required as AREA of WORK is not more than 500 sq m.  
- Yes→ required with application if AREA of WORK exceeds 500 sq m. (or if extremely complex design (unlikely))  
- *Optional submission of schedules indicates the professional will oversee the work as outlined on the schedules themselves.*  
- *Mandatory submission indicates the professional will oversee the work as outlined on the schedules themselves.*  
- **BARRIER-FREE PROVISIONS** are to be shown on the architectural drawings, with dimensions and explanatory notes as needed.  
- *Some plumbing rough-ins fail to meet barrier-free dimensional tolerances for fixtures and fittings; check carefully.*  
- N/A→ A relaxation letter provided by Municipal Affairs must be received at permit office prior to Building Permit issuance. |

OPENING A CANNABIS RETAIL LOCATION

DEVELOPMENT PERMIT APPLICATION SAMPLES:
GUIDE TO COMPLETING SHORT-FORM COMMERCIAL BUILDING PERMIT APPLICATION

| ELECTRICAL WORK: | Examples include new electrical service, fire alarm work, new lighting and receptacle circuits, etc. |
| Exit Sign Note: | Any building requires ‘exit’ signs visible on approach to the exit where |
| | ○ more than 2 storeys in building height, or |
| | ○ with more than 150 occupants. |
| Exit signs are required at egress doorways from any room with an occupant load of more than 60 that has normal lighting levels that make it difficult to locate doorways (e.g., lounges, bars, dance halls, etc.). |
| Where no exit is visible from |
| ○ a public corridor or corridor used by the public (A, B occupancies), or |
| ○ an open floor area with more than 150 occupants, |
| exit sign(s) with an arrow or pointer indicating direction shall be provided. |
| Exit signs are to be continuously illuminated. |
| Internally illuminated exit signs: conform with CSA C22.2 No. 141, “Emergency Lighting Equipment”. |
| Externally illuminated exit signs: CAN/ULC-S572, “Photoluminescent and Self-Luminous Signs and Path Marking Systems”. |
| Emergency Lighting Note: | Unless shown to be unnecessary, every building requires emergency lighting |
| ○ in exits, public corridors, corridors used by the public, corridors serving classrooms, |
| ○ in access to exit in open floor areas and where the public may congregate, |
| ○ in care areas of child care centres, food prep areas in commercial kitchens, etc., |
| ○ conforming to CSA C22.2 No. 141, “Emergency Lighting Equipment” if self-contained battery units, and |
| ○ with illumination average levels of not less than 10 lx at floor/tread level, and minimum not less than 1 lx. |
| (Where incandescent lighting is provided, lighting equal to 1 W/m² of floor area is acceptable.) |

ELECTRICAL drawings --Are any separate electrical drawings signed, dated and sealed by the engineer? |
❑ No→ no fire alarm system is in the building. |
❑ Yes→ new fire alarm system provide stamped drawings + schedules. |

ENERGY EFFICIENCY SUMMARY and CHECKLIST (edmonton.ca/energycode) |
• Work in an energy-efficient new building must coordinate with the building’s energy code compliance path: consult early and closely with the building owner to learn the meaning and impact of this. Typically, this means light fixtures and some appliances must have a minimum energy efficiency rating, however this does not extend to equipment of the business itself that is not part of the building. New means built according to ABC2014:9.36 or NECB2011 |
• For older, small buildings, refer to alterations guidance and additional information at edmonton.ca/energycode. Small means a building in which combined retail, office, low-hazard industrial and common space floor area does not exceed 300 sq m—with or without residential component in the building such that the entire building does not exceed 300 sq m.
OPENING A CANNABIS RETAIL LOCATION

DEVELOPMENT PERMIT APPLICATION SAMPLES: GUIDE TO COMPLETING SHORT-FORM COMMERCIAL BUILDING PERMIT APPLICATION

---

exceed 600 sq m footprint and the building does not exceed 3 storeys in building height (within scope of ABC2014:9.36.).
- Energy Code does not apply to alteration of older, large buildings at this time.

**FIRE SAFETY PLAN** You require a Fire Safety Plan (FSP) for construction, renovation and demolition work, to be submitted at the time of building permit application. Most FSPs are straightforward, however in larger, multi-tenant buildings, impact on others in event of emergency must be considered. Failure to provide a FSP satisfactory to Fire Rescue Services will hold up the permit.
- Review the Bulletin on working in partially occupied buildings.
- Life safety systems will be maintained during work.
- The FSP can provide alternate ways of maintaining an acceptable level of safety during construction.
- Impact on others in event of fire- and non-fire emergency must be considered in the plan.
- Contact FRS for more guidance to write a FSP.

</tr>
</tbody>
</table>
Exit separation FRR: An exit is one or more of or combination of exterior doorway / exterior or interior stairway, ramp or passageway / a horizontal exit at a firewall / or fire escape (see ABC:3.4.7 for restrictions). ABC:3.4.4/9.4.4 pertains to exit separation and characteristics. Note exit through lobby must have characteristics of an exit.

- Fire-resistance rating of exit depends on building size and use
- Door/glazing fire-protection rating and limitations relate to the required exit fire-resistance rating
- Fire Doors and other ‘closures’
  - Do not paint over or remove frame and door labels
  - ULC labeled hardware is required
  - Door-release (‘panic’) hardware required on exit doors
    - in assemblies where occupant load is more than 100,
    - every door from an exit stair shaft leading to an exit lobby,
    - exterior door from an exit stair shaft in a building where occupant load is more than 100, and
    - every exit door from a floor area containing a high-hazard industrial occupancy.
  - Interior exit doors swing in the direction of exit travel when occupant load is greater than 60
  - Exterior exit doors must swing in the direction of exit travel

| N/A-exit doorways direct to exterior | 1/2h: ½” TypeX gypsum | 1h: ⅝ TypeX gypsum | 2h |
Building Permit Application Process--from start to finish

Many small interior alterations may be done without involvement of a designer, with plans and application prepared by a knowledgeable person such as the building contractor--the “constructor”--who will do the work. A retail store (“mercantile” and associated office and storage spaces) where the total area of work is not more than 500m² (5382ft²) does not strictly require professional involvement for the general work; that is to say, architect- and engineer-stamped drawings are not automatically required.

Some parts of the construction details MAY require stamped engineer design (e.g., structural design for carrying new equipment on the roof, design of a new exterior cladding system that is not found in the Alberta Building Code 2014 (ABC), etc.)

Larger or more complicated interior alteration projects require professional involvement for all aspects of the work. This means stamped drawings/documents and professional’s schedules are to be submitted. A licensed interior designer may provide professional services within limitations.

If a question arises, a Safety Codes Officer makes the final determination of what permits are required.

A valid Development Permit (DP) must be in place for any project before Building Permit (BP) processing. If the BP application is submitted after the DP is approved, the Development Officer will rapidly verify the proposed work on the new drawings aligns with the terms of the DP.

A Plans Examiner will then perform a full Code review of the project, and provide a Plans Examination report if needed listing any items requiring clarification or amendment in order to demonstrate ABC compliance. A Commercial Final Building Permit will be issued upon satisfactory resolution of any identified issues.

Additional permits may be required for proposed HVAC (Heating, Ventilating and Air Conditioning), Plumbing, Gas or Electrical work. A Safety Codes Officer makes the final determination of what permits are required for a project, or will sign off where no permit is required. Updates on permit progress will be emailed.

Assessment of an acceptable level of safety when reviewing plans for alteration of an existing building can only be done with a complete picture of existing conditions and of proposed work. It is imperative that the application form is completed entirely so that the best assessment can be made based on the information provided in the application. Incomplete information will result in delays while the applicant is asked for more, or research into older permits is undertaken.

Provide the Project Numbers from the Permit to the subtrades who can then claim the trade permits that have already been paid for with the application. Work may proceed when those trades permits are issued. Inspections should be called as outlined on the permit conditions. Coordinate closely with the trades so their inspections can be called to minimize delays. Service level target is 2-5 days for inspection, due to seasonal and scheduling variability.

Be sure to read ALL Building Permit conditions printed on the permit as soon as it is issued, and act accordingly. Much important information is printed there.

When all trades permits have been successfully inspected and concluded, a mandatory Final building inspection is conducted. When that is successfully completed, the space may be occupied. A Building Permit, however, does not imply or grant permission from City of Edmonton or any provincial or federal authority to operate any business without other required regulatory approvals.

Depending on job scale, complexity and context, a Fire Inspector may conduct a joint inspection with the Building Inspector so that there is a seamless transition from a ‘space under construction/alteration’ to one that is ‘operational’ and thus, from that moment on, governed by the Alberta Fire Code which mandates periodic inspections, fire safety systems maintenance, and so on.
Hoarding Building Permit Process--from start to finish

If a public sidewalk, alley or street must be used to do some part of your project, an "OSCAM Permit" will be required. If the disruption of the public space is for more than a few hours or parts of a few days, a Hoarding Building Permit may also be required for hoarding needed to protect the public. Use the SHORT FORM COMMERCIAL BUILDING PERMIT APPLICATION.

We need to have one copy of each of the following to process a Hoarding Building Permit:

- **a)** APPLICANT CORPORATE NAME (exactly as it appears on corporate seal) with DURATION that the hoarding will be wholly or partially erected at the location: provide planned start and stop dates.
- **b)** Proof of general liability INSURANCE of minimum two million dollars, valid for the duration indicated above, as stipulated in the standard hoarding agreement.
- **c)** SITE PLAN of areas to be hoarded, clearly indicating (proposed or existing) building location(s), dimensions of setbacks from property lines, sidewalks, boulevards, trees, hydrants, bus stops, street furniture and obstructions in the vicinity of the proposed hoarded area, etc., with proposed location(s) and type(s) of hoarding: fence or covered walkway. Fenced areas exclude unauthorized persons and provide exclusive use areas for the duration of the permit; covered walkways provide protection from side and overhead hazards while work on or over the building proceeds.
- **d)** HOARDING DESIGN details: covered walkways require site-specific authenticated structural design, fences require dimensioned photo, tear sheet or sketch.

FEES, for building permit, and electrical permit where lighting is required within a covered walkway, for hoarding on public land per Bylaw 15894.

The site plan will be reviewed for compliance with Bylaw 15894 and ABC:Part 8, and evidence of your intention to maintain to the greatest extent reasonable the positive characteristics of any affected existing public sidewalks near the site. The site plan will then be circulated to Network Operations/Roadway Operations for an OSCAM, which coordinates your activity with other planned uses of the same Right-of-Way.

A Hoarding Agreement will then be prepared for APPLICANT corporate seal over signature in two copies. (Alternatively, properly-executed affidavit verifying signing authority may be presented with Agreement in lieu of corporate seal.) Both copies are to be returned to the permit office for City seal; one will be returned to the APPLICANT with the issued Hoarding Building Permit.

Do NOT start construction of hoarding without Hoarding Permit in place. Follow the Conditions printed on that Building Permit.

**Resources**

Requirements to obtain permits are listed in ABC2014:DivA:1.1.1.1 and in DivC:2.2.9. Alberta “Permit Regulation” lists when you are obligated to obtain a permit for work, when you are lawfully able to do work without permits, and who may obtain them. Edmonton “Safety Codes Permit Bylaw” 15894 contains municipal regulations related to permits, inspections and temporary hoarding permits.

Schedules of Professional Involvement are for work that requires a registered engineering or registered architectural professionals to be involved in design and oversight of the project. [ABC2014:DivC:2.4.1.1.]

Alberta Fire Code applies to construction-site fire safety at construction/alteration/demolition sites. For help with a safety plan, consult Construction Site Fire Safety Plan or call Fire Rescue Service at 780 496 3628.
