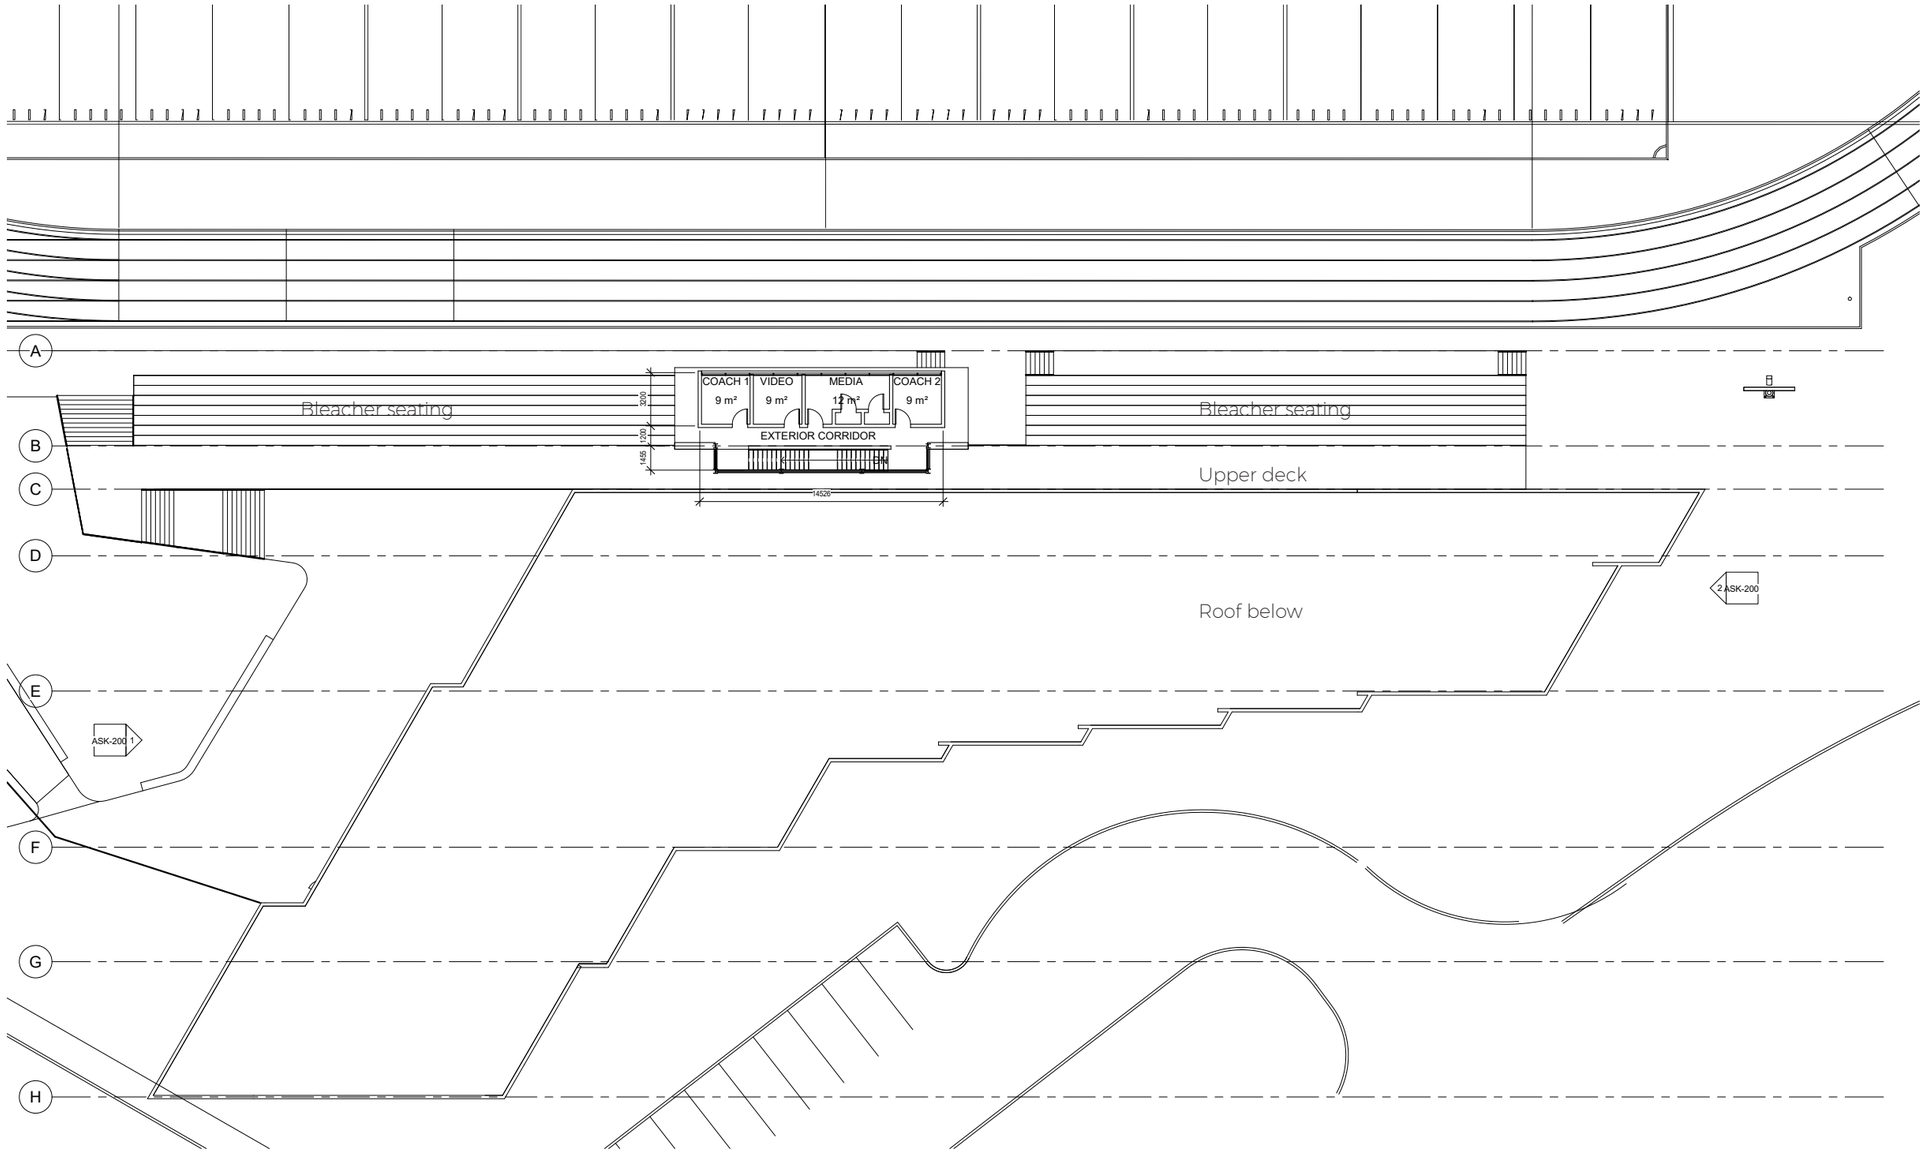
FIELD LEVEL PLAN

NORTH

0m 5m 10m

The public plaza acts as the main concourse into the venue. Utilizing the south-most gated entrance, leisure users can access the recreational track and artificial turf field year-round. While the majority of the building is seasonal and only accessible during sporting events, the multi-purpose room, partner storage, and washrooms are accessible year-round. The circulation strategy of the development funnels both the players and spectators first through the public plaza. Spectators have access to the concession and ticket areas, as well as to the grandstand seating via the inclined path through the public plaza, whereas players have access to the change rooms and direct field access.



SPOTTER'S BOX PLAN

NORTH

0m 5m 10m

The Spotter's Box contains video, media and coaching rooms that overlook the field level. Circulation is via an open-air walkway and stairs that connect to the bleachers.
