

# Construction Details

## Construction

- Two stages of construction will take place one half of the bridge at a time to allow continued local traffic access at all times
- During each stage, one lane of two-way traffic will be maintained by temporary signals
- Traffic delays are anticipated
- Pedestrians and cyclists will be accommodated on the bridge during construction.
- The gravel parking lot to the west of the bridge will not be accessible during construction.
- The Shared Use Paths that lead to the bridge will remain open and construction impacts will be minimal.

## Timeline

- Construction is scheduled to begin in late April 2017 and continue until October 2017.
