

# FACT SHEET

## 34 Street Corridor Planning Whitemud Drive to Baseline Road

### BACKGROUND

The City of Edmonton and Strathcona County are working together to plan the widening of 34 Street between Whitemud Drive and Baseline Road. This is required to accommodate future growth and industrial development in the area. Recommendations will include long term upgrades as well as short term improvements to enhance current functioning of the corridor.

### HIGHLIGHTS

- Traffic volumes are projected to grow from 15,000 to over 30,000 vehicles per day as the corridor develops and population grows in the Capital Region.
- 34 Street is a heavily used commuter route during peak hours which results in delays.
- The roadway will be upgraded to two or three lanes for both north and southbound traffic.
- Intersections will be improved and will include turning lanes and signals where required.
- Traffic, access, and safety aspects of the roadway will be reviewed.

### PROJECT TIMELINE

- Identify issues
- Public survey
- Traffic and safety analysis
- Develop concept plans
- Public information session
- Present concept plans

This is a planning study; there is no start date to begin construction to widen 34 Street.
