

# Building a Garbage Stand

## Access

It is important that the garbage stand allows cans to be accessed from the front and not the top. It is unsafe for your collector to lift a full garbage can out of the top of the stand.

## Size

Please ensure that your garbage stand is large enough to accommodate your garbage cans and blue bags.

## Height

Please build your garbage stand 12 inches off the ground.

## Latches

If your garbage stand has doors, please install the hinges on the sides, not the top. Also, the latches on the doors should be easy to operate if wearing large gloves.

## Visibility

Please ensure your garbage stand is visible. If it is hidden, the collector may miss your garbage pick-up.

## Location

Please ensure that your garbage stand is located no more than three metres away from the front street or rear lane.
