From April 13th to April 20th 2021, 3,316 Insight Community members engaged with The City of Edmonton by answering a survey that was sent to them via email. The survey was designed to gather members’ opinions on a variety of topics (Mixed Topics) including:

- Ideal survey length

Mixed Topic survey is composed of a variety of questions on various topics that help different departments make decisions using public feedback. This document highlights what we heard from the Insight members on the topics included in the April 2021 Mixed Topics survey.

As it is a non-random online survey, a margin of error is not reported for these results. However, if a probability sample had been used results for a random sample of 3,316 would be accurate to ± 1.4 percentage points, 19 times out of 20.

Note: 5 anonymous individuals accessed the survey link through the City website. While reporting back to the Insight Community members through this monthly report, we only include the survey results for the members.
