Average Weekly Light Trap Counts of Female *Culex tarsalis* in the Edmonton Area

![Graph showing the average weekly light trap counts of Female *Culex tarsalis* in the Edmonton Area. The graph includes two lines: one for *Culex tarsalis 2003* (arrival of Wnv) and one for *Culex tarsalis 2018*. The x-axis represents the date of trap collection, and the y-axis represents the average number of female *Culex tarsalis*. The graph shows a peak in counts in late July and early August, with a significant increase in 2003 due to the arrival of West Nile Virus (Wnv).]
