

2016

50 St Over Sherwood Park Freeway  
Bridge Rehabilitation

## 50 STREET OVER SHERWOOD PARK FREEWAY BRIDGE REHABILITATION

INFORMATION SESSION  
March 16, 2016

# 2016

## 50 St Over Sherwood Park Freeway Bridge Rehabilitation

### WELCOME

#### Purpose of the Information Session:

- To inform residents, commuters, and businesses about the rehabilitation project
- To present information regarding the anticipated scope of work, community impacts, and timelines for the project
- To discuss with residents, commuters, and businesses the proposed Bridge Rehabilitation and Traffic Accommodation plans for the project
- To gather comments and answer questions from residents and businesses regarding the information and plan presented

# 2016

## 50 St Over Sherwood Park Freeway Bridge Rehabilitation

### PROJECT DESCRIPTION

Construction is scheduled to begin in April 2016 with completion by August of 2016. The repairs are necessary to extend the life of the structure and ensure continued safety of motorists and pedestrians. During construction, there will be selected lane and ramp closures at the 50 Street bridge over Sherwood Park Freeway.

Major repairs for the bridge will include:

- Replace the existing concrete overlay with a new polymer modified asphalt (PMA) overlay
- Construction of a new concrete pier cap below the existing pier cap
- Replace the deck joint seals at the pier and abutments
- Miscellaneous concrete repairs at columns, wingwalls and abutments
