

The City will provide temporary traffic control measures as well as a basic traffic plan in the lead up to the event.

A-frame signage and traffic cones will be provided this year to event organizers for traffic control. There is no cost for this basic service.

Event organizers must be able to pick up and return A-frames and cones for their event. They will also be responsible for storing and ensuring these materials are kept in good condition during the period they are in their possession.

**If during your event and emergency takes place, site volunteers will need to ensure traffic barricades are removed at all access points to allow emergency vehicles to enter.**

The organizer is responsible for setting up the traffic control materials before the event and removing all materials off the street at the conclusion of the event.

**A-frames and cones should be set up like this:**

**For Residential Streets (including roads and alleys):**

- A total of 2 x A-frame signs and 4 x Traffic Cones will be provided.
- Both ends of the residential street must be closed off.
- One A-frame ROAD CLOSED sign must be placed in the middle of the road and one traffic cone to each side of the A-frame sign as shown in the photo above at both ends of the street to be closed off.

**For Cul de Sacs:**

- A total of 1 x A-frame signs and 2 x Traffic Cones will be provided.
- The access to the Cul de Sac must be closed off.
- One A-frame ROAD CLOSED sign must be placed in the middle of the road and one traffic cone to each side of the A-frame sign as shown in the photo above.
