

Construction Notice – (Updated) Overnight Concrete Pouring near 111 Street and 23 Avenue

Last week, the City of Edmonton shared a [construction notice](#) about overnight concrete pouring on/around August 21 near 111 Street and 23 Avenue. This work has been rescheduled, and will begin on/around **August 28**.

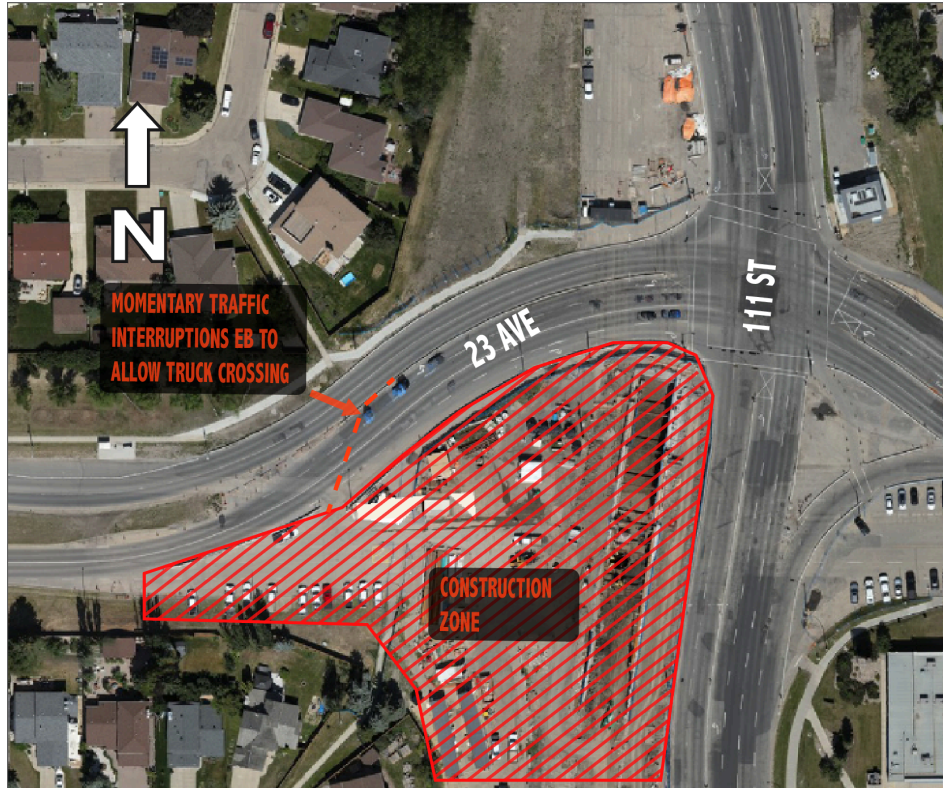

We apologize for the inconvenience this may have caused, and thank residents and drivers for their patience during this time.

Ledcor, the Design-Build contractor for the project, will pour concrete for the future LRT underpass near 111 Street and 23 Avenue. This work will occur during evening/overnight hours due to temperature constraints, and to allow for continuous, optimal pour conditions.

Crews will begin pouring between 7 p.m. and 5 a.m. and continue for approximately eight hours.

Throughout this work, flaggers will be on site to momentarily stop traffic to allow concrete trucks access to the construction zone. The area will see an increase in truck traffic as well as a temporary increase in noise.

Map: 111 Street and 23 Avenue Intersection Construction Zone

Other Impacts

- Heavy truck traffic will increase on 111 Street and 23 Avenue.
- **Vehicle noise will be associated with this work.** Mitigation measures are in place to minimize these disruptions as much as possible. Ledcor is committed to following all City of Edmonton bylaws and regulations and has obtained an overnight roadwork permit so work can take place during overnight hours. *City of Edmonton Bylaw C14600.
