

## 2026 ASSESSMENT CHANGE REPORT

# Residential, single-family, detached homes

SORTED BY: NEIGHBOURHOOD

PRODUCED JANUARY 12, 2026

Edmonton

Because every property is unique, not all neighbourhoods or single-family, detached homes reflect the city-wide median change in assessed property values.

Every year, the City updates market values for all properties within Edmonton as required by provincial legislation. This market value update is then used to determine the amount of municipal and provincial education property taxes property owners pay in relation to the value of the real estate they own.

Between July 1, 2024 and July 1, 2025, a typical single-family, detached home in Edmonton saw an increase in values of **5.16% per cent**. The typical single-family, detached home in Edmonton is assessed at **\$492,500**.

This report outlines the median assessed values for single-family, detached homes (does not include condominiums, townhomes, manufactured homes and other types of residential properties) in each Edmonton neighbourhood, where the property count as of December 31, 2025, was greater than 50.

## Residential, single-family, detached homes

SORTED BY: NEIGHBOURHOOD

PRODUCED JANUARY 12, 2026

The median assessment value for **2026**.

Neighbourhood	Ward	2026			2025			2024 - 20255 Median of Percent Changes
		Property Count	Median Assessment	2025 - 2026 Median of Percent Changes	Property Count	Median Assessment		
ALBANY	Anirniq	228	\$640,000	6.20%	228	\$606,500	4.37%	

Total number of properties that were considered “100% complete” in that neighbourhood as of December 31.

The median of the percentage changes in assessment values for each property from **2025 to 2026**.

#### How do we calculate this number?

First, we determine the percentage change in each property’s individual assessment.

Then, we calculate the median of these percentages.

This change does not represent the difference between the 2025 and 2026 median assessments.

The median of percentage changes is a good indicator of value fluctuations within a group of properties.
