

Land Development

LEGEND

Developed:
Land has necessary infrastructure in place for residential construction. In most cases, homes are built or under construction in these areas.

Under construction:
Construction of infrastructure like sewers, utilities, streets, bike lanes and landscaping in public areas/parks is underway.

Planned:
Rezoning, planning and engineering design work has begun.

Planning and building a sustainable community like Blatchford means leaving room for new opportunities. As the world changes and the community grows, so will we. The plan above may evolve over time.
