

Commercial Building - Fire Separation Inspection

This inspection is conducted **by request only**. Request this inspection when:

- The following is available on site:
 - Fire stopping catalog details
 - Installer's fire stopping certification
 - Fire stopping installation date
- Hallway/corridor/party wall separations are in place behind bulkheads or dropped ceilings.
- Shafts are drywalled and taped with the appropriate layers of fire rated gypsum board.
- Fire extinguisher cabinets are drywalled and taped.
- Fire dampers are installed.
- Paper copies of permits and City-reviewed plans available on site

To request and if you have questions about scheduling a fire separation inspection please email buildingic@edmonton.ca.
