

Commercial Building - Interim Inspection

This inspection is **not a final inspection** and will not produce the final occupancy document.

An interim inspection can be requested at a variety of construction stages, such as:

- [Fire separation / Fire stopping](#)
- Preliminary final (will not produce the final occupancy document)
- Framing inspection
- Insulation and vapour barrier
- Etc.

An interim inspection is required for all projects exceeding a construction value of \$50,000.

Projects exceeding a construction value of \$200,000 may require several interim inspections, based on project complexity. Inspection types include fire stopping/separation inspections, preliminary or interim inspections and final inspection.

If you have questions about scheduling an interim inspection please email buildingic@edmonton.ca before requesting the inspection.
