

## ***Assignment #3: Nature Walk***

You get to go on your very own mini field trip! Go on a nature walk with your class during school or with a parent at home in your neighborhood.

**Observe:** While on your nature walk, be sure to use your **FIVE** senses:

- What do you see? Look for trees during your walk.
  - Can you find **FIVE** trees?
  - Can you find a **White Spruce** or a **Lodgepole Pine**?
  - Can you find a tree with **needles (coniferous)** or a tree with **big flat leaves (deciduous)**?
- What do you hear?
- What does it smell like?
- How do you feel while walking in nature?

**Task:** When you are back from your nature walk, it's time to get crafty! Draw, color or paint a picture of the trees you observed. Maybe you can add some leaves you collected, or take the paper outside and do a 'bark rubbing'.

**You have completed Assignment #3**
