

Do you have traffic safety concerns in your neighbourhood? We want to hear from you!

Kiniski Gardens has been selected for a Vision Zero Street Lab! The City would like to hear about your lived experiences and traffic safety concerns driving, walking, biking or rolling in your neighbourhood to help improve road safety and livability in the community.

What is a Vision Zero Street Lab?

Vision Zero Street Labs is a program designed to address traffic safety concerns at the neighbourhood level by installing traffic calming measures. Each Street Lab is tailored to the unique needs of the neighbourhood and its road users in order to creatively address problems such as speeding, shortcutting and other unsafe driving behaviours.

Engagement Opportunities
