

Upgrades coming to McKernan traffic calming measures!

Improving Traffic Safety

Adaptable traffic calming measures were installed in **McKernan** in June 2024 to address traffic safety concerns such as speeding, shortcutting and other unsafe driving behaviours.

Opportunities to convert the installed adaptable traffic calming measures to permanent are reviewed and prioritized periodically at select locations. We're happy to share that nine of the measures from the McKernan Vision Zero Street Lab have been selected and will be converted to asphalt permanent measures. All other traffic calming measures in the neighbourhood will remain in place.

Adaptable traffic calming measures help the City to quickly improve road safety and adjust as needed. When these measures prove effective and budget allows, they are replaced with permanent asphalt or concrete solutions for long-term durability.

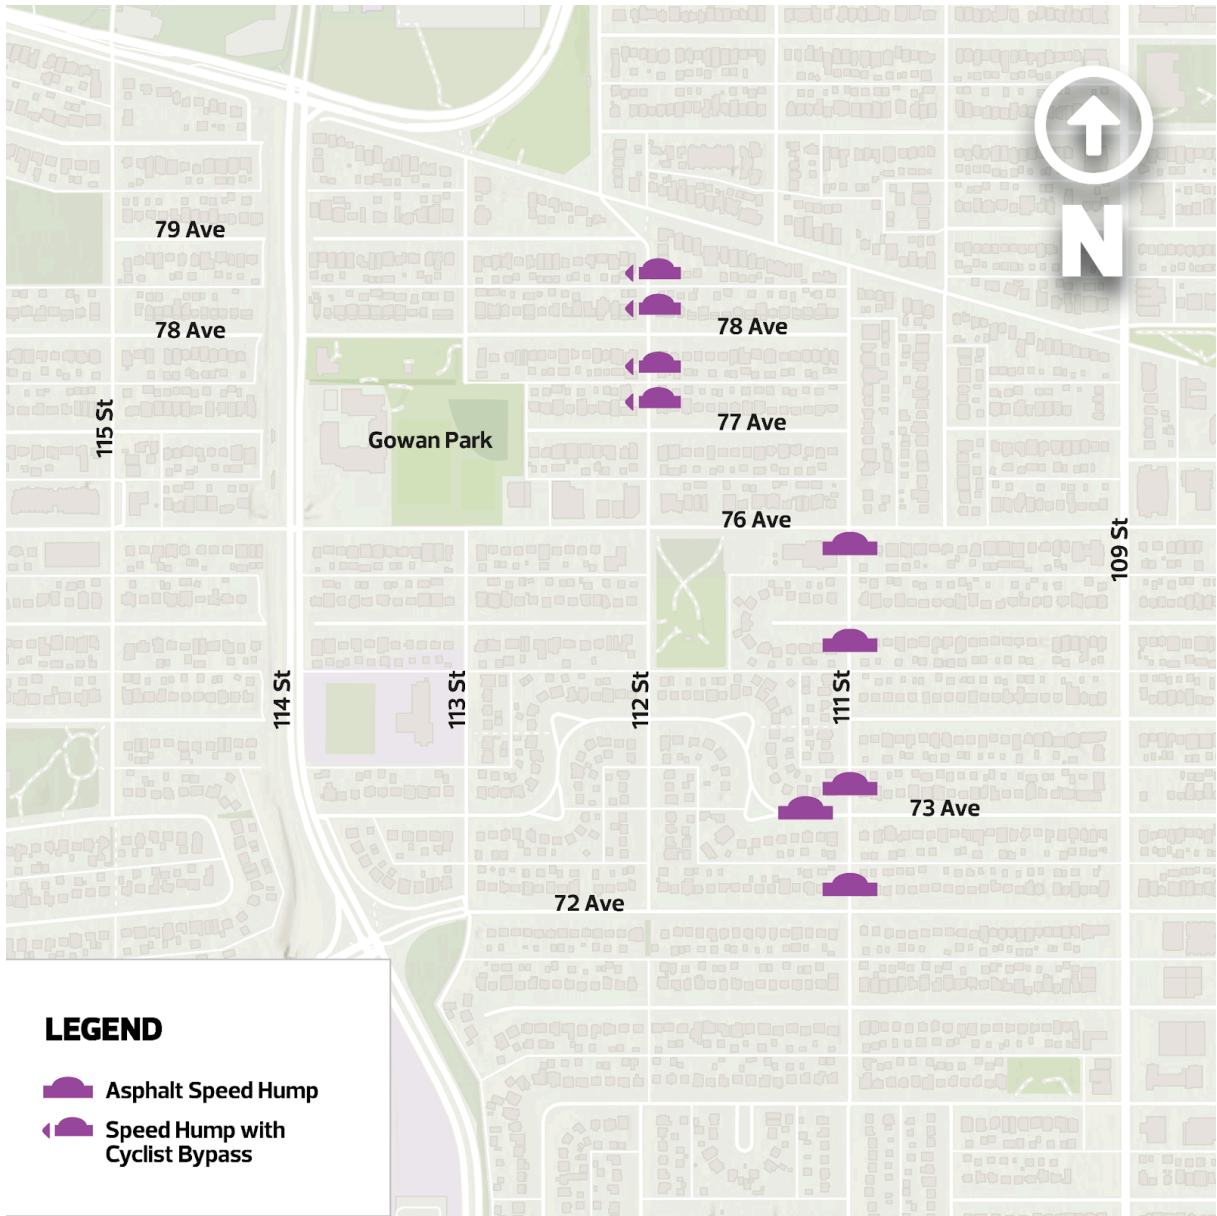

Planned Upgrades

Traffic calming measures outlined in the table below will be converted to permanent measures by **July 2025**, weather and resources permitting.

Measure and Location	Benefit	Example Image
<p>What We're Upgrading Speed humps:</p> <ul style="list-style-type: none"> • Four speed humps along 111 Street between 72 Avenue and 76 Avenue • One speed hump on 73 Avenue west of 111 Street • Four speed humps along 112 Street between 76 Avenue and 79 Avenue 	<p>Speed humps can help:</p> <ul style="list-style-type: none"> ✓ Slow vehicle speeds. ✓ Discourage shortcutting through the neighbourhood. ✓ Reduce the risk of serious crashes. ✓ Increase safety for people walking, biking and rolling.
