

Completed NRP Projects 2009 - 2022

While condition is the primary criteria in the prioritization of neighbourhoods for renewal, other criteria related to integration of other programs and funding opportunities play a role in this prioritization. The City approaches Neighbourhood Renewal as an opportunity to create positive social and economic impact with communities, using renewal of the local and collector roads, sidewalks, street light and community park space elements as a catalyst to align numerous aspects of community planning and programs.

The Neighbourhoods Renewal Program has completed or is anticipated to complete the following neighbourhood-wide renewal projects from 2009 to the end of 2022.

Neighbourhood Name	Renewal Type	Construction

Renewal Glossary

Reconstruction - Replacement of alley, local and collector roads by reconstructing both the base and pavement structure. Conversion to LED alley and street lights if lighting currently exists. Opportunities will be presented to property owners to add alley lighting or upgrade to decorative street lighting through the Local Improvement process (if feasible). Neighbourhood reconstruction also includes sidewalks, curbs and gutters.

Overlay - Road repaving and concrete and sidewalk spot repairs to address safety hazards.

Microsurfacing - Roads are re-sealed with a thin coating. This is a preventive maintenance effort to extend the life of the existing pavement.
