

Vision Zero Street Labs Road Map

Neighbourhood Selection

The City reviews prospective neighbourhoods for engagement based on public traffic safety concerns and a variety of technical safety considerations.

Selected neighbourhoods will be shared on edmonton.ca/streetlabs and residents will be informed of engagement opportunities.

Engagement

The City provides an opportunity for the community to share feedback on locations and types of traffic safety concerns experienced in their neighbourhood.

A What We Heard Report will be created and shared with community members post engagement.

Creating the Street Lab Plan

The City will use technical data, as well as public feedback, to develop a Street Lab plan to address traffic safety concerns.

Installation

The City will bring the Street Lab to life by installing a variety of traffic calming measures.

An Installation Public Notice with the Street Lab plan will be mailed to all residences in the Neighbourhood.

Assessment

The City will review traffic data and community feedback received through 311 to assess if any adjustments are needed.

An Assessment Summary will be shared with community members when available.

Street Lab in Place

The Street Lab is currently active in the neighbourhood. Community members can continue to share any concerns or maintenance requirements through 311.
