

Neighbourhood Empowerment Team

Staff Profile

Connie Marciniuk
Community Safety Liaison
City of Edmonton
Downtown Division

Connie has always been interested in positively impacting individual well-being and it was when she partnered with NET when she was with an external agency that she learned how collaborative work through a community safety lens can help accomplish this goal.

In her over 10 years working with the Neighbourhood Empowerment Team she has had the amazing opportunity to work with diverse groups of individuals, community stakeholders, and agencies. She has contributed to a wide range of projects; some to address tenants rights and housing standards, traffic safety, community connectedness and spirit, property crimes, and how the physical environment contributes to crime (via Crime Prevention Through Environmental Design). Nowhere else has she found such a unique opportunity to connect with people, hear their perceptions on what impacts safety then work together to address these factors.
