170 Street Pedestrian Bridge: Pathway Closure

Construction for the new 170 Street Pedestrian Bridge is anticipated to begin in late October. Prior to construction starting, The existing shared-use path between 88 Avenue NW and 87 Avenue NW will be closed to allow for removal of old ramp and bridge abutment, removal of existing trees, and construction of a new temporary pathway to allow access for the duration of the construction project. This will be for a two week period starting on October 25 to November 7. During this closure, pedestrian traffic will be detoured to 165 Street for both north and south traffic directions as detailed in the below image map. These maps will also be posted along the route for ease of understanding.

Scope of Work

The project will construct a new pedestrian bridge over 170 Street, including removing the existing structure, and constructing the new bridge, including the access ramp, shared-use path and retaining wall. Prior to construction starting, selected trees will be removed that are in the alignment of the new pedestrian bridge and access ramp. This will require the pathway to remain closed during this work.

The City of Edmonton Noise Bylaw (#14600) will be followed, with construction taking place 7 am to 9 pm daily, except for Sundays, 9 am to 7 pm. Any debris from construction will be cleaned and managed on a regular basis. There will be minimal overnight road closures and daytime path closures. Information will be provided in advance of any closures.

Access

During construction, access to businesses and residential areas for both vehicles and pedestrians will be maintained to the extent possible to ensure public safety at all times. A detour route has been detailed below to allow for pedestrians in the area ease of access while this section of pathway is closed. Detour signage map is posted along this route for clarity.

If you have special access requirements, such as DATS, please advise the contact person listed below, as soon as possible.

Please retain this bulletin for contact information and a diagram of the work located on the back
