Why do you require an inspection?
Inspections are a required part of the permit process. Whether a home is being built or a smaller scale residential construction project is undertaken, the permit is not complete until all work passes the required inspections. The City of Edmonton’s Safety Codes Officers conduct compliance monitoring inspections in alignment with applicable codes, standards and bylaws.

Note: The City of Edmonton oversees the inspection process but any work completed on residential property is the owner’s responsibility.

Inspection Checklist

Single family, Semi-Detached & Row Housing (each unit is separate)
The following inspections are required, each occurring at different stages of your home’s construction:

1. Plumbing Groundworks Inspection (required prior to work being covered)
   - Building permit is pulled
   - Contractor information on permit is accurate
   - Summer/winter drain connection (if applicable)
   - Installations meet the National Plumbing Code (NPC) standards:
     - Pipes have grade and adequate support
     - Fixtures below street level are protected from flooding
     - Proper water supply line sizing

2. Plumbing Stacks Inspection (required prior to work being covered)
   - Building permit is pulled
   - Contractor information on permit is accurate
   - Installations meet the National Plumbing Code (NPC) standards:
     - Pipes are protected from freezing

3. Natural Gas Inspection (required prior to work being covered)
   - Building permit is pulled
   - Contractor information on permit is accurate
   - Furnace and hot water heater BTU information is on site and attached to gas line
   - Gas lines hold air and have a test gauge
   - If furnace is installed, venting is completed

Private Sewage Disposal Systems
Each permit may require a different number of inspections based on the scope and value of the project.

1. System Review Inspection
   - Building permit is pulled
   - Contractor information on permit is accurate
   - Installations must meet the Alberta Sewage Systems Standard of Practice
   - Soil sample reports
   - Layout design on site

2. Installation Inspection
   - Building permit is pulled
   - Contractor information on permit is accurate
   - Installations must meet the Alberta Sewage Systems Standard of Practice
   - Evaluate the final system before it is covered

Secondary Suites

1. Rough-in Inspection
   - Installations meet the National Plumbing Code (NPC) standards
   - Gas lines for any new appliances
   - Gas line sizing
   - Furnace venting

2. Final Inspection
   - Proper installation of CSA approved fixtures
   - Appliances are the correct size BTU
   - Final gas appliance installation—connection to venting
Documentation required prior to booking an inspection

- Upon issuance of a permit, the permit holder must comply with the terms and conditions of the permit including requesting site inspections at specific stages of construction.
- Building permits must be issued prior to booking an inspection.

Requesting an inspection

- Request inspections by visiting the project dashboard in selfserve.edmonton.ca or if necessary, by calling 311 (outside Edmonton: 780-442-5311).
- Inspections methods include: In-Person, Remote Video Inspections (RVI) and Verification of Compliance (VOC).
- Property address must be visible from the street
- Individuals 18+ must be present to provide access for inspections in occupied dwellings
- Ensure access to all areas of inspection is clear and unobstructed
- Secure and contain all pets

Inspection fees

(1) Unless otherwise specified, the fee payable for a permit includes all mandatory inspections.
(2) A fee for an additional inspection is payable where:
   (a) the municipal address of the parcel for which the permit was issued is not displayed; (b) when an inspection has been previously arranged; and, when (i) the inspector is unable to access the building (ii) the undertaking is not ready for an inspection or (iii) a previously identified deficiency has not been corrected.

(S.2, Bylaw 17000, January 1, 2015) (S.7, Bylaw 17450, January 1, 2016) (S.21, Bylaw 15894, Consolidated January 1, 2016)

Cancelling or rescheduling an inspection

Cancel or reschedule inspections by visiting the project dashboard in selfserve.edmonton.ca or if necessary, by calling 311 (outside Edmonton: 780-442-5311). Cut off time for requesting a cancellation without reinspection fees is 12 pm on the business day prior to the day the inspection is scheduled. Reinspection fees apply to cancellation requests received later than that.

Documents required on site for an inspection

Copies of permits and City-approved plans must be on site.

Possible inspection outcomes

Acceptable
No deficiencies need to be corrected.

Acceptable with conditions
Minor deficiencies have been identified but are not considered life safety.

Unacceptable
Multiple deficiencies or life safety concerns have been identified. Re-inspection is necessary before proceeding.

* Life safety: recognizing occupant safety and egress requirements

Timelines

- Inspection can be requested based on the capacity of a given day. Once capacity has been reached, that day will no longer be available and a future date will need to be selected. Inspections are typically completed on the day requested.
- Request an inspection before 12pm and where capacity remains, it will be scheduled for the following business day.
- Required to begin work within 90 days of issuance of permit
- Permits expire (24 months from date of issuance)

Safety

City of Edmonton inspectors adhere to Provincial Occupational Health and Safety regulations including for safe access and wearing appropriate footwear while conducting inspections.
