This flow chart only applies to on-street work activities in residential areas, shown as residential roads on the Reference Map.

Temporary crossings and tree protections are outside the scope of this flow chart. All excavations on roads, sidewalks or boulevards require OSCAM permits.

To see criteria for OSCAM permits for all road classes, use the Decision Matrix.

**LEGEND**

**TTC**: Temporary Traffic Control

**TMP**: Transportation Management Plan

**Obstruction**: The static placement of an object occupying and interfering with the normal function of a space, including a sidewalk, bike facility, parking or travel lane.
