

Construction Notice: Valley Line West LRT Environmental Mitigation Measures at Lewis Farms Transit Centre

On or around September 16, 2021, Marigold Infrastructure Partners (MIP) will begin environmental mitigation measures for the construction of an outlet into the Potter Greens East Stormwater Management Facility. These measures will include installation of an aquadam water barrier and a silt curtain in the stormwater pond. The aquadam will isolate the work area from the rest of the stormwater pond allowing the area to be dewatered and construction to be conducted in the dry. Prior to the aquadam install, the silt curtain will be put in place outside of the work area to prevent the spread of silt and sediment within the stormwater pond.

To accommodate this work, a portion of the shared use path around the pond will be closed on the west and south sides of the parking lot will be closed. Access to the Transit Centre will be maintained via 199 Street.

This work will occur during daytime hours (7 a.m. – 9 p.m. Monday – Saturday, 9 a.m. – 7 p.m. Sundays), however, the closure will remain in place until work is complete, approximately three weeks.

- Access to Lewis Farms Transit Centre will be maintained.
- Noise can be expected during construction.
- Construction work will create dust. Dust mitigation measures will be in place.
- For safety and security purposes, the area will be lit with work lights. MIP will ensure these lights are not a hazard to nearby motorists or shining into local homes.
- Every effort will be made to reduce the impact to the public.

Lewis Farms Environmental Mitigation Measures

The information in this bulletin is current to September 9, 2021. Please note that all dates are approximate and weather dependent. We thank you for your patience and understanding during the construction of the Valley Line West LRT project. Marigold Infrastructure Partners is excited to be a part of Edmonton's economic recovery.
