

Welder Foreman

DEFINITION

This is advanced foreman level work in welding and machining, fabrication and maintenance.

Work of this class involves scheduling, coordinating and supervising the duties of journeyman welders, machinists and journeyman of related trades, various apprentices and semi-skilled assistants involved in installation, fabrication, repair and maintenance of various equipment, machinery and assorted attachments. An incumbent may also perform some journeyman level work in addition to inspection of subordinates' work, estimating and allocating job times and costs, requisitioning supplies, maintaining records, preparing reports, etc. Incumbents are responsible for exercising independence in determining priorities in keeping with established policy, safety standards, and work commitments and providing technical assistance to subordinates. Work assignments are received from a supervisor through daily written instructions, oral discussion and planning sessions, or may take the form of direct departmental work requests. Work is evaluated through consultations inspection, cost reviews and feedback on efficiency and quality of work performed.
