135 Street and Ellerslie Road Widening 2019 Year End Update

Heritage Valley Trail (135 Street) opened to motorists on Monday, October 21, 2019. The new road officially replaces the now closed 127 Street as the connection from Ellerslie Road to Anthony Henday Drive.

Ellerslie Road will be open to full 4-lane capacity from Heritage Valley Trail to 112 Street by the end of November. The widened portions of Ellerslie Road will be surfaced with base asphalt for the winter, with final surfacing to be completed in 2020. The south half of the intersection of 119 Street and Ellerslie Road will be paved with temporary asphalt for the winter, which will be removed and replaced with permanent asphalt in 2020.

Work to be completed in 2020:

- Pavement reconstruction of the south half of 119 Street and Ellerslie Road intersection
- Final surface paving along new lanes of Ellerslie Road from Heritage Valley Trail to 112 Street
- Remaining sidewalk connections along Ellerslie Road between 119 Street and 127 Street
- Pavement renewal and concrete repairs along existing Ellerslie Road from 111 Street to 141 Street
- Final landscaping and tree planting
- New traffic/pedestrian signals at Rutherford Gate and 112 Street

Traffic Disruptions in 2020:

During construction in 2020, there will be lane reductions, traffic shifts, sidewalk closures and night time directional closures, as well as another small duration full closure of the 119 Street intersection at Ellerslie Road from Rutherford Road. Residents will be notified through area signage, website updates and the traffic disruption map.

Construction is anticipated to begin May 2020 (weather-dependent), and all work is scheduled to be complete for August 2020.

Please refer to the map on the back of this bulletin for further information in regards to the limits of construction.
