

July 2026

137 Avenue Ramps to Anthony Henday Drive

Construction on the new interchange ramps at 137 Avenue and Anthony Henday Drive will begin in late July or early August. The project will improve traffic flow, increase access to the northwest industrial area and increase industrial growth in Edmonton. The ramps and two signalized intersections along 137 Avenue are scheduled to be completed in 2027.

This project includes:

- Addition of northbound and southbound on- and off-ramps to the Anthony Henday Drive at 137 Avenue
- Two new signalized intersections along 137 Avenue at the ramp terminals

Traffic Impacts

There are no changes to pedestrian and cycling pathways. Motorists can expect the following changes during construction:

- 137 Avenue from 184 Street/Sir Winston Churchill Avenue to 170 Street will be reduced to a single lane in each direction.
- Occasional curb lane closures on Anthony Henday Drive at 137 Avenue will be required overnight from 10 p.m. to 6 a.m.
