Upgrades coming to High Park traffic calming measures!

Improving Traffic Safety

Adaptable traffic calming measures were installed in **High Park** in October 2025 to address traffic safety concerns such as speeding, shortcutting and other unsafe driving behaviours.

Opportunities to convert the installed adaptable traffic calming measures to permanent are reviewed and prioritized periodically at select locations. We're happy to share that three speed humps in High Park have been selected and will be converted to permanent measures. All other traffic calming measures in the neighbourhood will remain in place.

Adaptable traffic calming measures help the City to quickly improve road safety and adjust as needed. When these measures prove effective and budget allows, they are replaced with permanent asphalt or concrete solutions for long-term durability.

Planned Upgrades

Traffic calming measures outlined in the table below will be converted to permanent measures this construction season. Installation work can be expected to begin in **summer 2026**, weather and resources permitting.

Measure and Location	Benefit	Example Image
What We're Upgrading Speed humps: 151 Street between 107 Avenue and 110 Avenue	Speed humps can help: ✓ Slow vehicle speeds ✓ Discourage shortcutting through the neighbourhood ✓ Reduce the risk of serious crashes ✓ Increase safety for people walking, biking, rolling and driving
