

## Construction Notice – Tree removals in Blackmud Creek

In 2025, Ledcor began removing a mixture of trees, shrubs and vegetation in the Blackmud Creek Ravine on the east and west sides of 111 Street. Beginning the **week of February 9**, this work will resume, and trees and shrubs will be removed as necessary for the ongoing construction of the LRT bridge west of the existing traffic bridges. This work is expected to last **one week**. Please refer to the maps below for locations.

**Map 1: Tree removals at Blackmud Creek near 19 Avenue**

**Map 2: Tree removals at Blackmud Creek near 12 Avenue**

### Other Impacts

- Work will occur on weekdays and Saturdays between 7:00 a.m. and 5:00 p.m.
- No traffic disruptions are expected during the work.
- Efforts will be made to minimize noise, vibration and dust. Mitigation measures will be implemented to monitor and reduce these impacts.

In accordance with the municipal [Public Tree Bylaw](#), all tree removals will be conducted under the supervision of certified arborists. A nest sweep of the area is conducted by an avian wildlife biologist just prior to tree removals, and buffers are installed to protect nearby animals and nesting areas. Ledcor acknowledges Edmontonians are passionate about trees and have a desire to maintain the city's extensive urban canopy. The decision to remove a tree is never taken lightly. Once project construction is complete, new vegetation including trees, native grassland, shrubs and flowers will be planted along portions of the alignment.
