

THREE SCHEMES OF STREET NUMBERING WILL BE SUBMITTED

Form of Plebiscite on Street Numbering Decided Upon by Commissioners

WILL BE PRESENTED TO
COUNCIL ON TUESDAY

Date of Poll May Then Be Fixed
—South Side System an
Alternative Scheme

Are you in favor of—

1. That the present numerical system as started in 1913 be continued?

2. That the quadrant system as was used on the South Side be used hereafter radiating from First street and Jasper avenue?

3. That half numerically and half alphabetically arranged names be used, including a neutral zone radiating from First street and Jasper avenue?

Such are the three questions that the city commissioners will suggest to the council shall be used in connection with the proposed plebiscite on the street naming and numbering system. The council probably will consider the matter at its meeting tomorrow evening. The first question is the new system; the second is that in use on the South Side at present, and the third is that first suggested by the city engineer's department and which was discarded last year as too complicated and cumbersome.
