

Upgrades coming to Ritchie traffic calming measures!

Improving Traffic Safety

Adaptable traffic calming measures were installed in **Ritchie** in summer 2024 to address traffic safety concerns such as speeding, shortcutting and other unsafe driving behaviours.

Opportunities to convert the installed adaptable traffic calming measures to permanent are reviewed and prioritized periodically at select locations. We're happy to share that nine adaptable measures in Ritchie have been selected and will be converted to permanent measures. All other traffic calming measures in the neighbourhood will remain in place. Adaptable traffic calming measures help the City to quickly improve road safety and adjust as needed. When these measures prove effective and budget allows, they are replaced with permanent asphalt or concrete solutions for long-term durability.

Planned Upgrades

Traffic calming measures outlined in the table below will be converted to permanent measures this construction season. Installation is expected to begin in **summer 2026**, weather and resources permitting. During the conversion, the locations of measures may be adjusted based on feedback and best practices.

Measure and Location	Benefit	Example Image
