

March 2026

Wellington Bridge Girder Transportation and Lift

The City of Edmonton and PCL Construction continue to make progress on the Wellington Bridge Replacement project. As part of this work, bridge girders will be delivered to the site and installed next week. **Deliveries are scheduled to start the week of March 31 between 3 and 6 a.m for 3 to 5 days.** During this time, the girders will be transported to the site by up to three large trucks.

What to expect

- Access to your property may be briefly affected while trucks are entering the site. Crews will work to minimize disruptions and restore access as quickly as possible. Emergency access will be maintained.
- The 142 Street and Stony Plain Road intersection will be temporarily closed during deliveries. Edmonton police will be on site to manage traffic.
- Residents may notice additional noise from trucks, equipment and unloading activities during the early morning hours. We apologize for any inconvenience and encourage residents in this area to take steps to avoid early morning sleep disruption.

Access details

142 Street

- The 142 Street and Stony Plain Road intersection will be temporarily closed to allow for the delivery of the girders.
- The trucks will wait in a row on 142 Street, north of the intersection, until each truck can safely move through the intersection and back down 102 Avenue to Wellington Bridge. The intersection will be closed for approximately one hour on delivery days between 3 and 6 a.m.

102 Avenue to Stony Plain Road

- Once the trucks back down 102 Avenue to Wellington Bridge, the trucks will wait with the bridge girders until each girder is lifted by a crane into place on the bridge.
- Some traffic disruptions are expected between the construction site and 136 Street.

CONSTRUCTION BULLETIN

Edmonton

Thank you for your patience as this important work moves forward. See the staging map on the reverse of this bulletin for additional information.
