Starting in 2020, your neighbourhood will see the replacement of its aging collector and local roadway surfaces, street lights, and sidewalks as part of the City of Edmonton’s Neighbourhood Renewal program for mature neighbourhoods. The City of Edmonton Building Great Neighbourhoods team will explore the redevelopment of City-owned areas within the community, including green spaces and parks. We will look for opportunities and funding to make desired upgrades and enhancements in coordination with the Neighbourhood Renewal program.

Get involved!
This is your city and your neighbourhood. We want to understand how you experience your neighbourhood and ask for your input on what we might do to make it better.

We will engage and work with you on the renewal of roads, sidewalks, streetlights, and park spaces, and promote other community opportunities to enhance how people live and interact in your neighbourhood.

We commit to being open and transparent about how your input is used. Let’s make the most out of your neighbourhood.
Welcome to the Refined Designs Public Event

As a follow-up to the Draft Concept Designs event held in May 2019, we would like to share our refined designs with you for improvements in your neighbourhood for your feedback.

These designs include:

- Improved residential streets with measures to slow traffic
- Enhancements to green spaces and parks
- Improved connections for people who walk and bike

Your feedback will be used to ADVISE on the refined designs and confirm that they align with the vision and guiding principles to determine if anything needs to be adjusted or improved.

We will also be sharing information on the local improvement process for decorative street lights and sidewalk reconstruction.

How to participate

The following panels include the refined designs, as well as a summary for each including:

- what we heard at past events
- what we are considering for improvements
- what we want you to think about when leaving feedback

Please review the “Vision and Guiding Principles” handout you received and answer questions by placing sticky notes and dots directly on the panels.

Decision-making process

It is important to note, that your feedback will be one of the considerations when finalizing the designs. We will also look at City policies and programs, technical requirements, and funding to determine which designs will be built.
VISION AND GUIDING PRINCIPLES

Vision

Lorelei and Beaumaris are family-friendly neighbourhoods that welcome people of all ages and backgrounds. We are a safe and walkable community that is connected to key destinations like parks, schools and commercial areas. We are an active and vibrant community that enjoys nature and getting together with our neighbours.

Guiding Principles

- Celebrating nature and preserving trees and open spaces
- Feeling safe and having well-lit spaces
- Making the roads safer for all users (people who walk, bike, drive)
- Improving connectivity by having viable options to walk, bike and drive within and surrounding the neighbourhood
- Creating places for the community to come together and gather
- Creating easy access to neighbourhood destinations such as commercial areas, schools, parks and Beaumaris Lake
SIDEWALK IMPROVEMENTS – LORELEI

New sidewalk and parking restrictions*

Parking would need to be banned along the side of the street where new sidewalks are provided. Two-way traffic and one parking lane would be maintained on these streets.

New sidewalk and boulevard and parking restrictions*
SIDEWALK IMPROVEMENTS – LORELEI

We need more feedback...

## We heard that you...

<table>
<thead>
<tr>
<th>The design includes...</th>
</tr>
</thead>
<tbody>
<tr>
<td>- like that the shared-use paths will enhance connections and make it easier for people to get around the neighbourhood</td>
</tr>
<tr>
<td>- like that the shared-use paths will make better use of existing green space (ie. Green Corridor)</td>
</tr>
<tr>
<td>- like that the shared-use path will make it easier to access sports fields in Lorelei Park</td>
</tr>
<tr>
<td>- the addition of new and re-constructed shared-use paths throughout the neighbourhood to make it easier to walk and bike</td>
</tr>
<tr>
<td>- other amenities to provide areas for people to rest along the shared-use paths including seating areas, waste receptacles and lighting (More details on the location of these amenities are provided in the refined designs)</td>
</tr>
</tbody>
</table>

## Key changes from the previous concept:

- removal of the Castle Downs Road shared-use path concept
GREEN CORRIDOR

Refined design location

Existing condition

Utility corridor from 97 Street looking east

Utility corridor from Castle Downs Road looking west

- New 3.0m shared-use path
- New tree and shrub planting
- New wayfinding signage
- New feature planting

- New seating area with lighting and feature planting
- New concrete entry plaza and feature planting
- New waste receptacle
- New raised crosswalks and curb extensions
- New 3.0m shared-use path

Design element examples

Note: Feature planting is intended to enhance green space and should include flowering trees where possible, perennials and annuals.

Designs are subject to approvals and funding.
# GREEN CORRIDOR

## We heard that you...
- like that the shared-use path will increase usage of the green space and enhance connections within and surrounding the neighbourhood
- like the dog park because it will be well used, but have concerns that it may be too small as a fenced dog park
- have concerns about traffic noise from 97 Street
- want accessible space for people who bike and walk when crossing the streets that intersect the green corridor
- believe that lighting needs to be improved

## The design includes...
- amenities including lighting, seating and waste receptacles to make the space safer and more accessible
- shared-use path to enhance east-to-west connections
- new shrub and tree plantings to beautify the corridor
- off-leash dog park to support the corridor as a destination

## Key changes from the previous concept:
- the removal of the fence for the dog park as there is an existing berm that acts as a natural barrier to 97 Street

*Please note that this is a powerline corridor and that requirements and regulations from Altalink may impact the final design.*

## Does the concept align with our vision and guiding principles?

<table>
<thead>
<tr>
<th>Yes</th>
<th>No</th>
</tr>
</thead>

# LORELEI PARK

## We heard that you...
- like that the new east-to-west pathway will make it easier to access the sports fields
- like the seating, lighting, planting, waste receptacles and the upgraded playground
- want sight lines to be considered when planting trees within the park
- want drainage to be considered for pathway improvements

## The design includes...
- amenities including lighting, seating and waste receptacles to make the space safer and more accessible
- new trees and shrubs to beautify the park
- an east-to-west shared-use path and reconstructed north-to-south shared-use path to enhance connections
- curb extensions and raised crosswalks to discourage speeding, improve sight lines and make it easier to cross the street
- an upgraded playground to support the park as a destination

*Please note that upgrades to the playground would need to be led by the community.*

## Key changes from the previous concept:
- the addition of raised crosswalks along 103 Street and 109 Street to make it easier to access the park

## Does the concept align with our vision and guiding principles?

BEAUMARIS PARK TO BEAUMARIS LAKE

We heard that you...
- like that the improvements make the area more attractive and well-connected
- like that the improvements could reduce the amount of crime near the lake by making it a more welcoming space
- like the decorative crossing and boulevard trees to enhance the entrance to Beaumaris Lake
- have concerns about the removal of parking in front of Beaumaris Lake access

The design includes...
- curb extensions and raised crosswalks to discourage speeding, improve sight lines and make it easier to cross the street
- boulevard with trees and decorative crosswalks to discourage speeding and provide a more welcoming entrance to Beaumaris Lake
- a reconstructed shared-use path to enhance connections

Key changes from the previous concept:
- the addition of curb extensions at 158 Avenue and 100 Street

*Please note that amenities like lighting, seating and waste receptacles are being considered near the lake through the Beaumaris Lake Rehabilitation Project.

Edmonton
### BEAUMARIS ROAD

#### We heard that you...
- like the boulevard with trees to beautify the street
- like the curb extensions and raised crosswalks to discourage speeding and improve safety for people who walk
- have concerns that the curb extensions will make the road too narrow and impact winter maintenance
- have concerns about limiting driveway access along Beaumaris Road south of 155 Avenue
- want crossing improvements at the Beaumaris Road and 155 Avenue intersection

#### The design includes...
- a wider grassy boulevard and reduced road width to discourage speeding and create a larger natural buffer between the sidewalk and street
- curb extensions and a raised crosswalk to improve sight lines and make it easier to cross the street
- a decorative crosswalk near 158 Avenue to support the commercial hub as a destination
- a wider sidewalk on both sides of the street to make it easier for people who walk to get around

#### Key changes from the previous concept:
- the removal of the proposed rehabilitated entrance signage

*Please note that the redesign of Beaumaris Road will not limit driveway access and will ensure sufficient road widths are provided.

CONSTRUCTION

What does the city need to consider or be aware of during construction? Do you have any questions about construction?

Please use a sticky note to share your comments/questions.
LOCAL IMPROVEMENT PROCESS

Decorative Street Lights
As part of neighbourhood renewal, the community has the option to DECIDE on and pay for an upgrade to decorative street lights. As an upgrade from the standard galvanized street lights, decorative street lights have features that include colour, pole styles, pole arm type and luminaire options.

The community submitted an Expression of Interest for decorative street lights in early June 2019. The submission included the following design elements:

- **Pole Colour:** Black
- **Decorative Arm:** Heritage
- **Pole Style:** Octagonal
- **Luminaire:** Renaissance

The City sent out an Expression of Interest (EOI) package containing estimated costs for the upgrades to decorative street lighting to registered property owners in September 2019. The package included a form with a yes or no indication for responses. Property owners have until **November 20, 2019** to respond to the form.

For more information please see the welcome table or visit the following website: www.edmonton.ca/DecorativeStreetlights

Sidewalk Reconstruction
The community will also have the opportunity to DECIDE on sidewalk reconstruction. A notice will be sent out four to six weeks prior to construction with more information.
NEXT STEPS

The next steps for renewal in Lorelei and Beaumaris will include deciding on the local improvement for decorative street lights, finalizing the designs and preparing for construction. We will share the final designs with you in early 2020 and will gather feedback on construction. We will also provide the opportunity to make a decision on sidewalk reconstruction at this time.

The future opportunities to engage include:

- Decorative Street Lights Expression of Interest Form
  - Submission Deadline of November 20, 2019
- Lorelei Pre-Construction Public Event – Early 2020
- Beaumaris Pre-Construction Public Event – Early 2021

Thank you for your input!

For more information on neighbourhood renewal including future opportunities to engage, and to sign up for our email subscriber list, please visit: edmonton.ca/BuildingLoreleiBeaumaris

Please use a sticky note to share any final remarks.
