CYCLING: LET'S BUILD IT BETTER. TOGETHER.

Edmonton

Drop-in Open House

Objectives

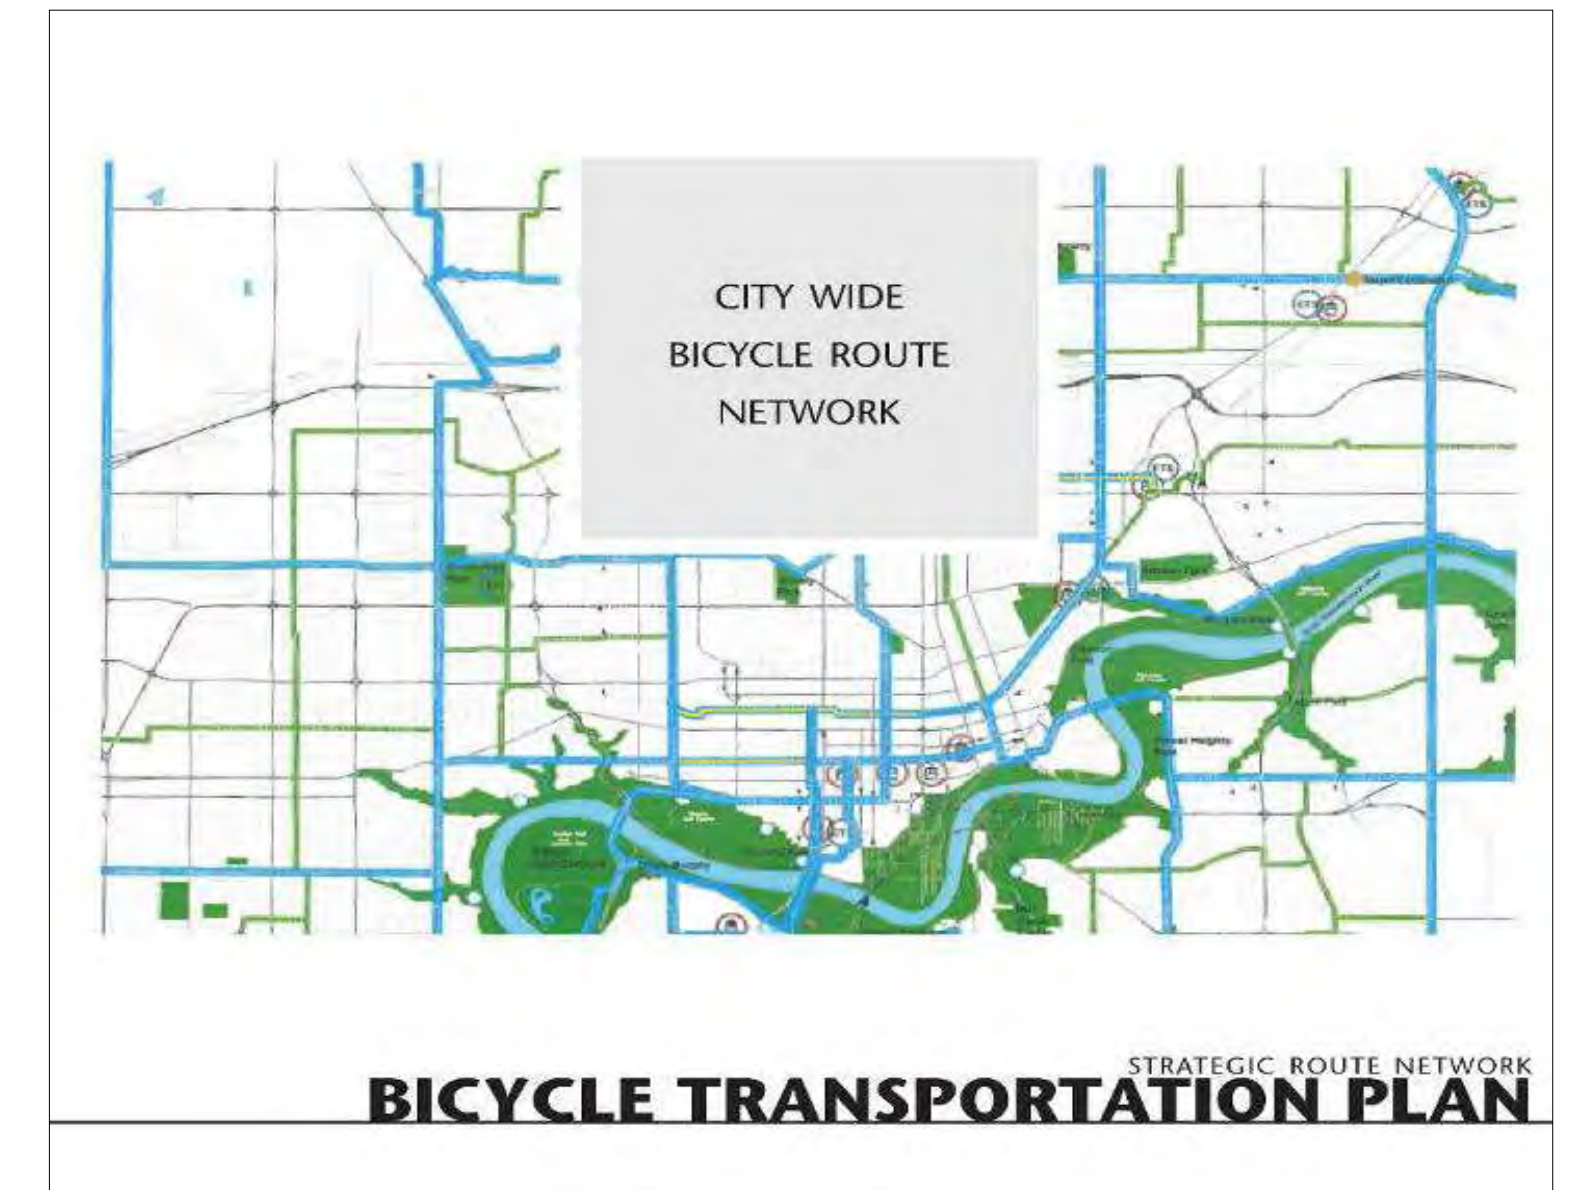

- To share information on the scope of the upcoming 2016 construction of the 83 Avenue major bike route (96 Street to 99 Street Section)
- To provide background on the project construction process

- 2016 ROAD CONSTRUCTION
- 2016 SIDEWALK CONSTRUCTION
- 2017 / 2018 ROAD CONSTRUCTION
- 2017 / 2018 SIDEWALK CONSTRUCTION

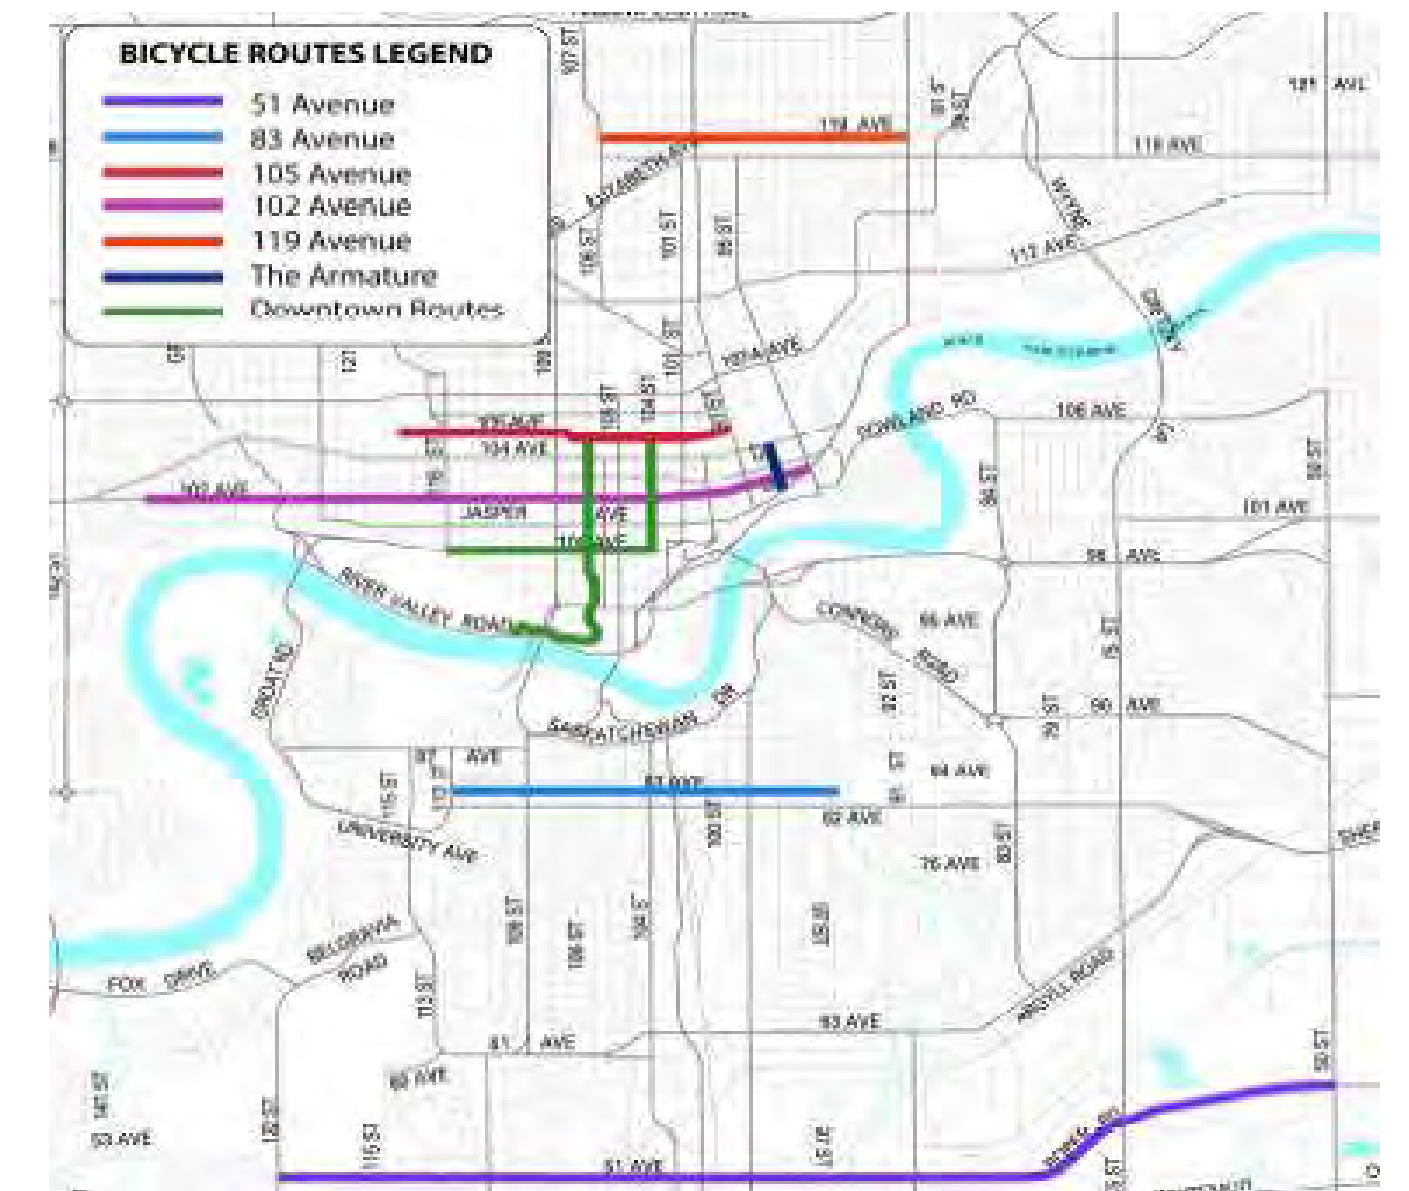

Council Direction (June 2014)

Transportation Master Plan and Bicycle Transportation Plan: *Council approved in 2009*

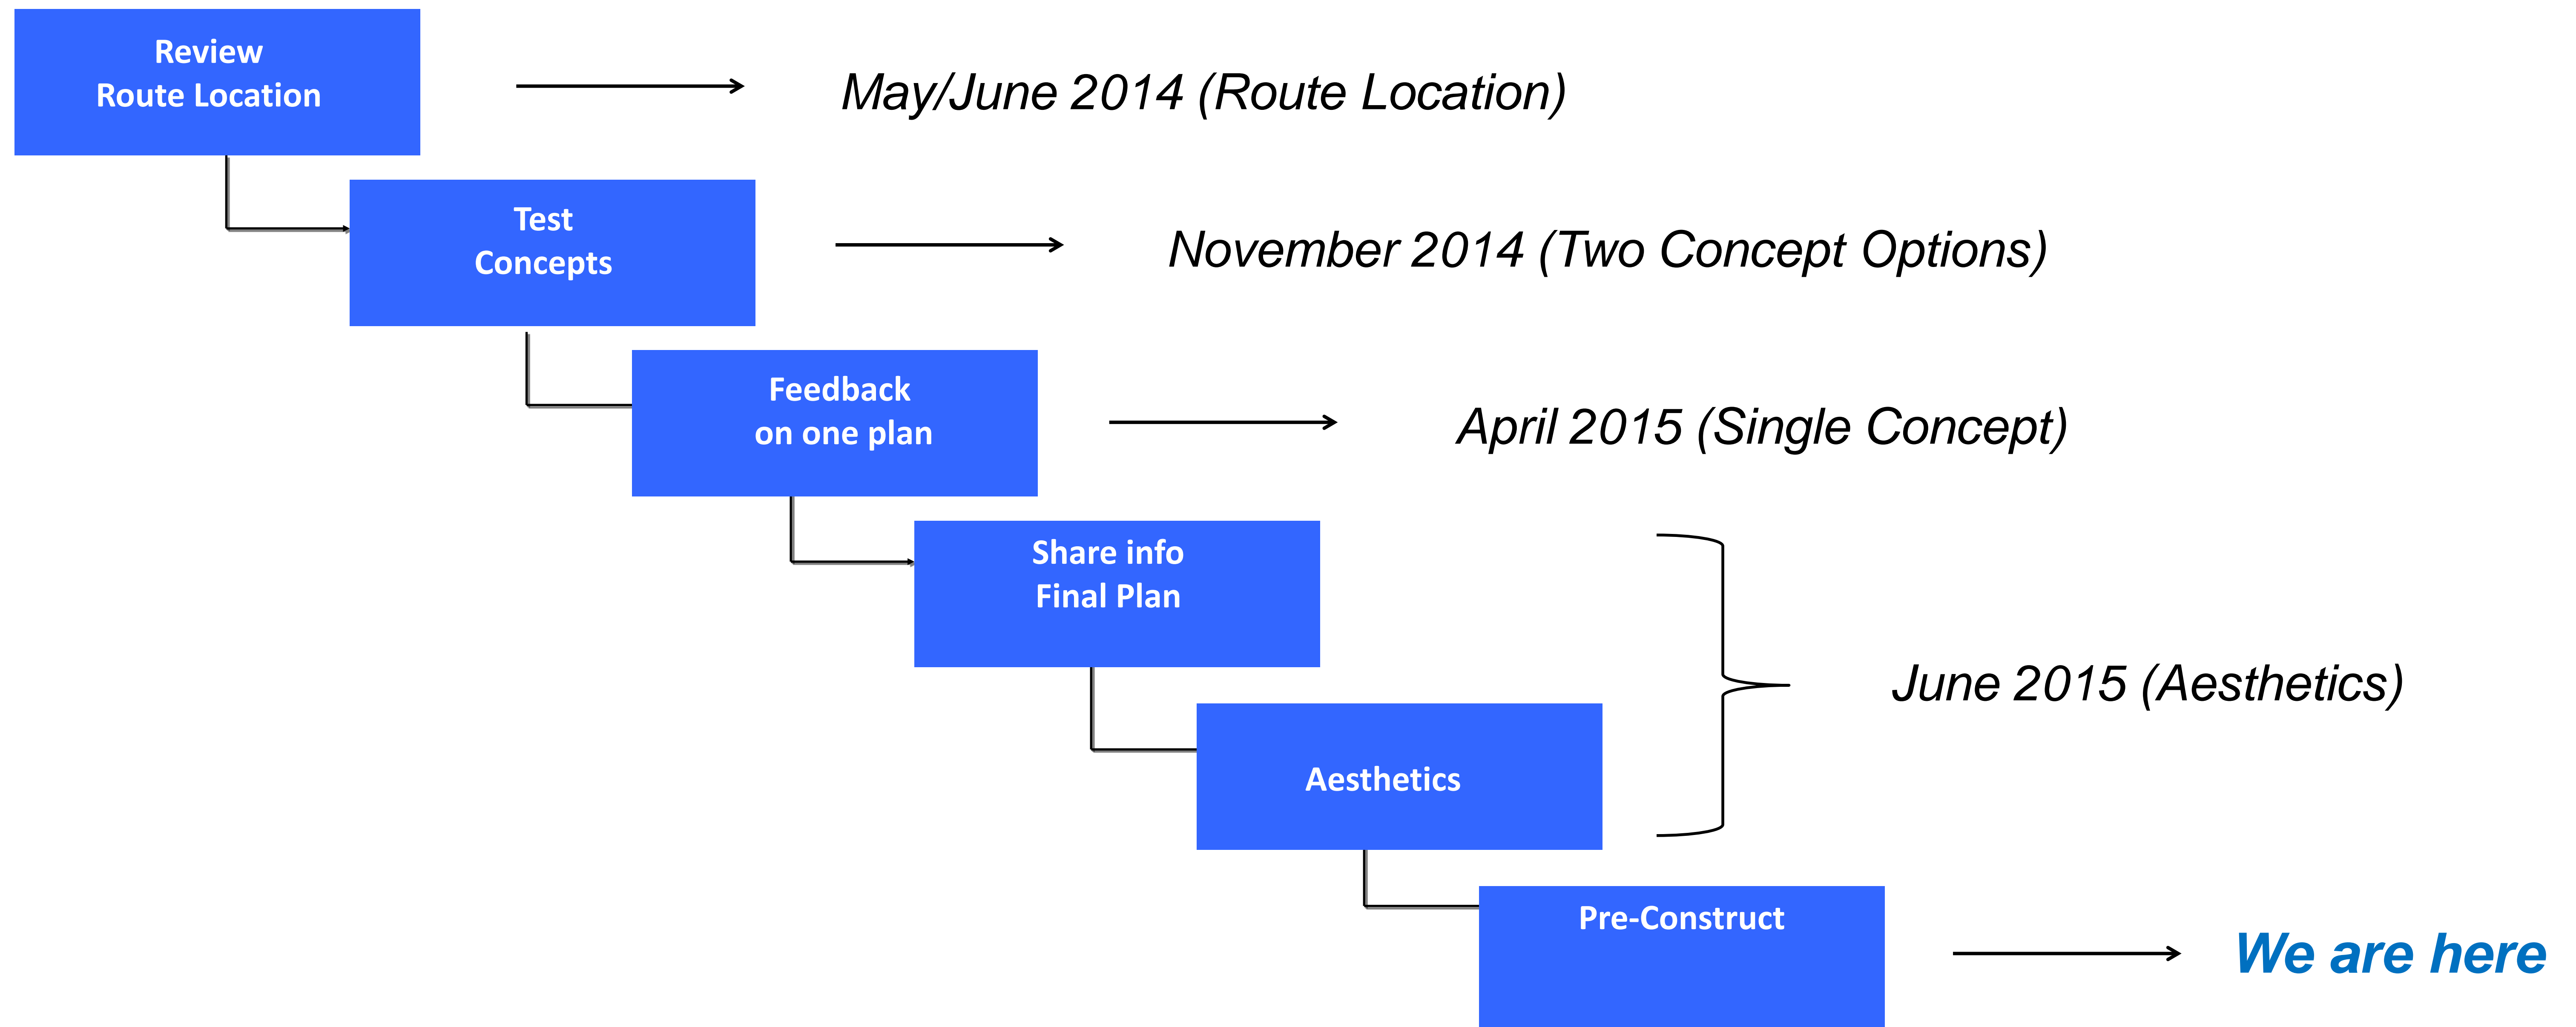

Council Direction in 2014: Major Bike Grid

- *Plan for higher quality infrastructure*
- *Focus on existing routes with greater existing ridership*
- *More opportunities for public input, earlier in the project (route options and evaluation criteria)*

Council Direction (June 2014)

Major Bike Route Grid Engagement

Consultation to Date

- 290 – Online Dialogue (Route Location)**
- 163 – Public Workshops (Route Location)**
- 40 – Stakeholder Conversations (Route Location)**
- 170 – Pop-up at Farmer's Market**
- 101 – Online Dialogue (Two Concepts)**
- 183 – Public Workshops (Two Concepts)**
- 19 – Stakeholder Conversations**
- 134 – Online Dialogue (Single Concept)**
- 183 – Public Workshops (Single Concept)**
- 86 – One-on-one Stakeholder Interviews**
- 10 – Stakeholder Hubs**
- 146 – Open House (Aesthetics)**
- 35 – Stakeholder Hubs (Aesthetics)**

**Total
Participation:
1560**

Project Overview

83 Avenue Major Bike Route

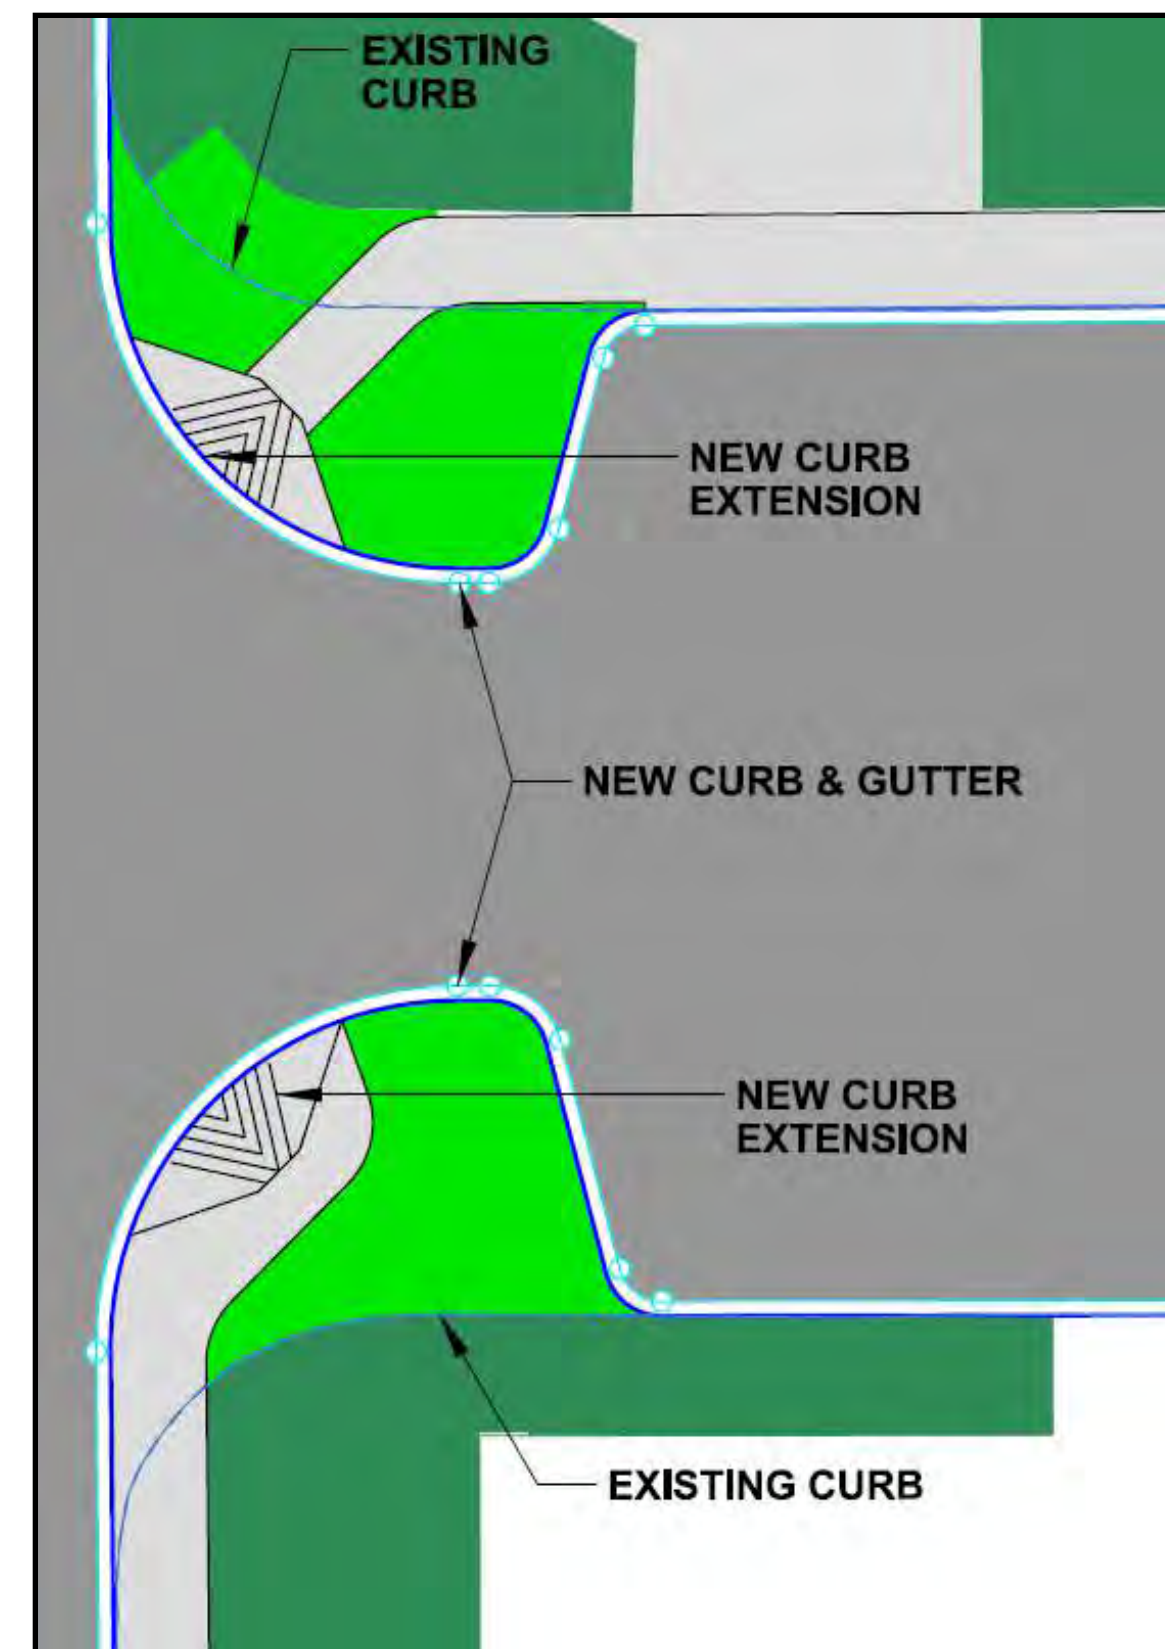

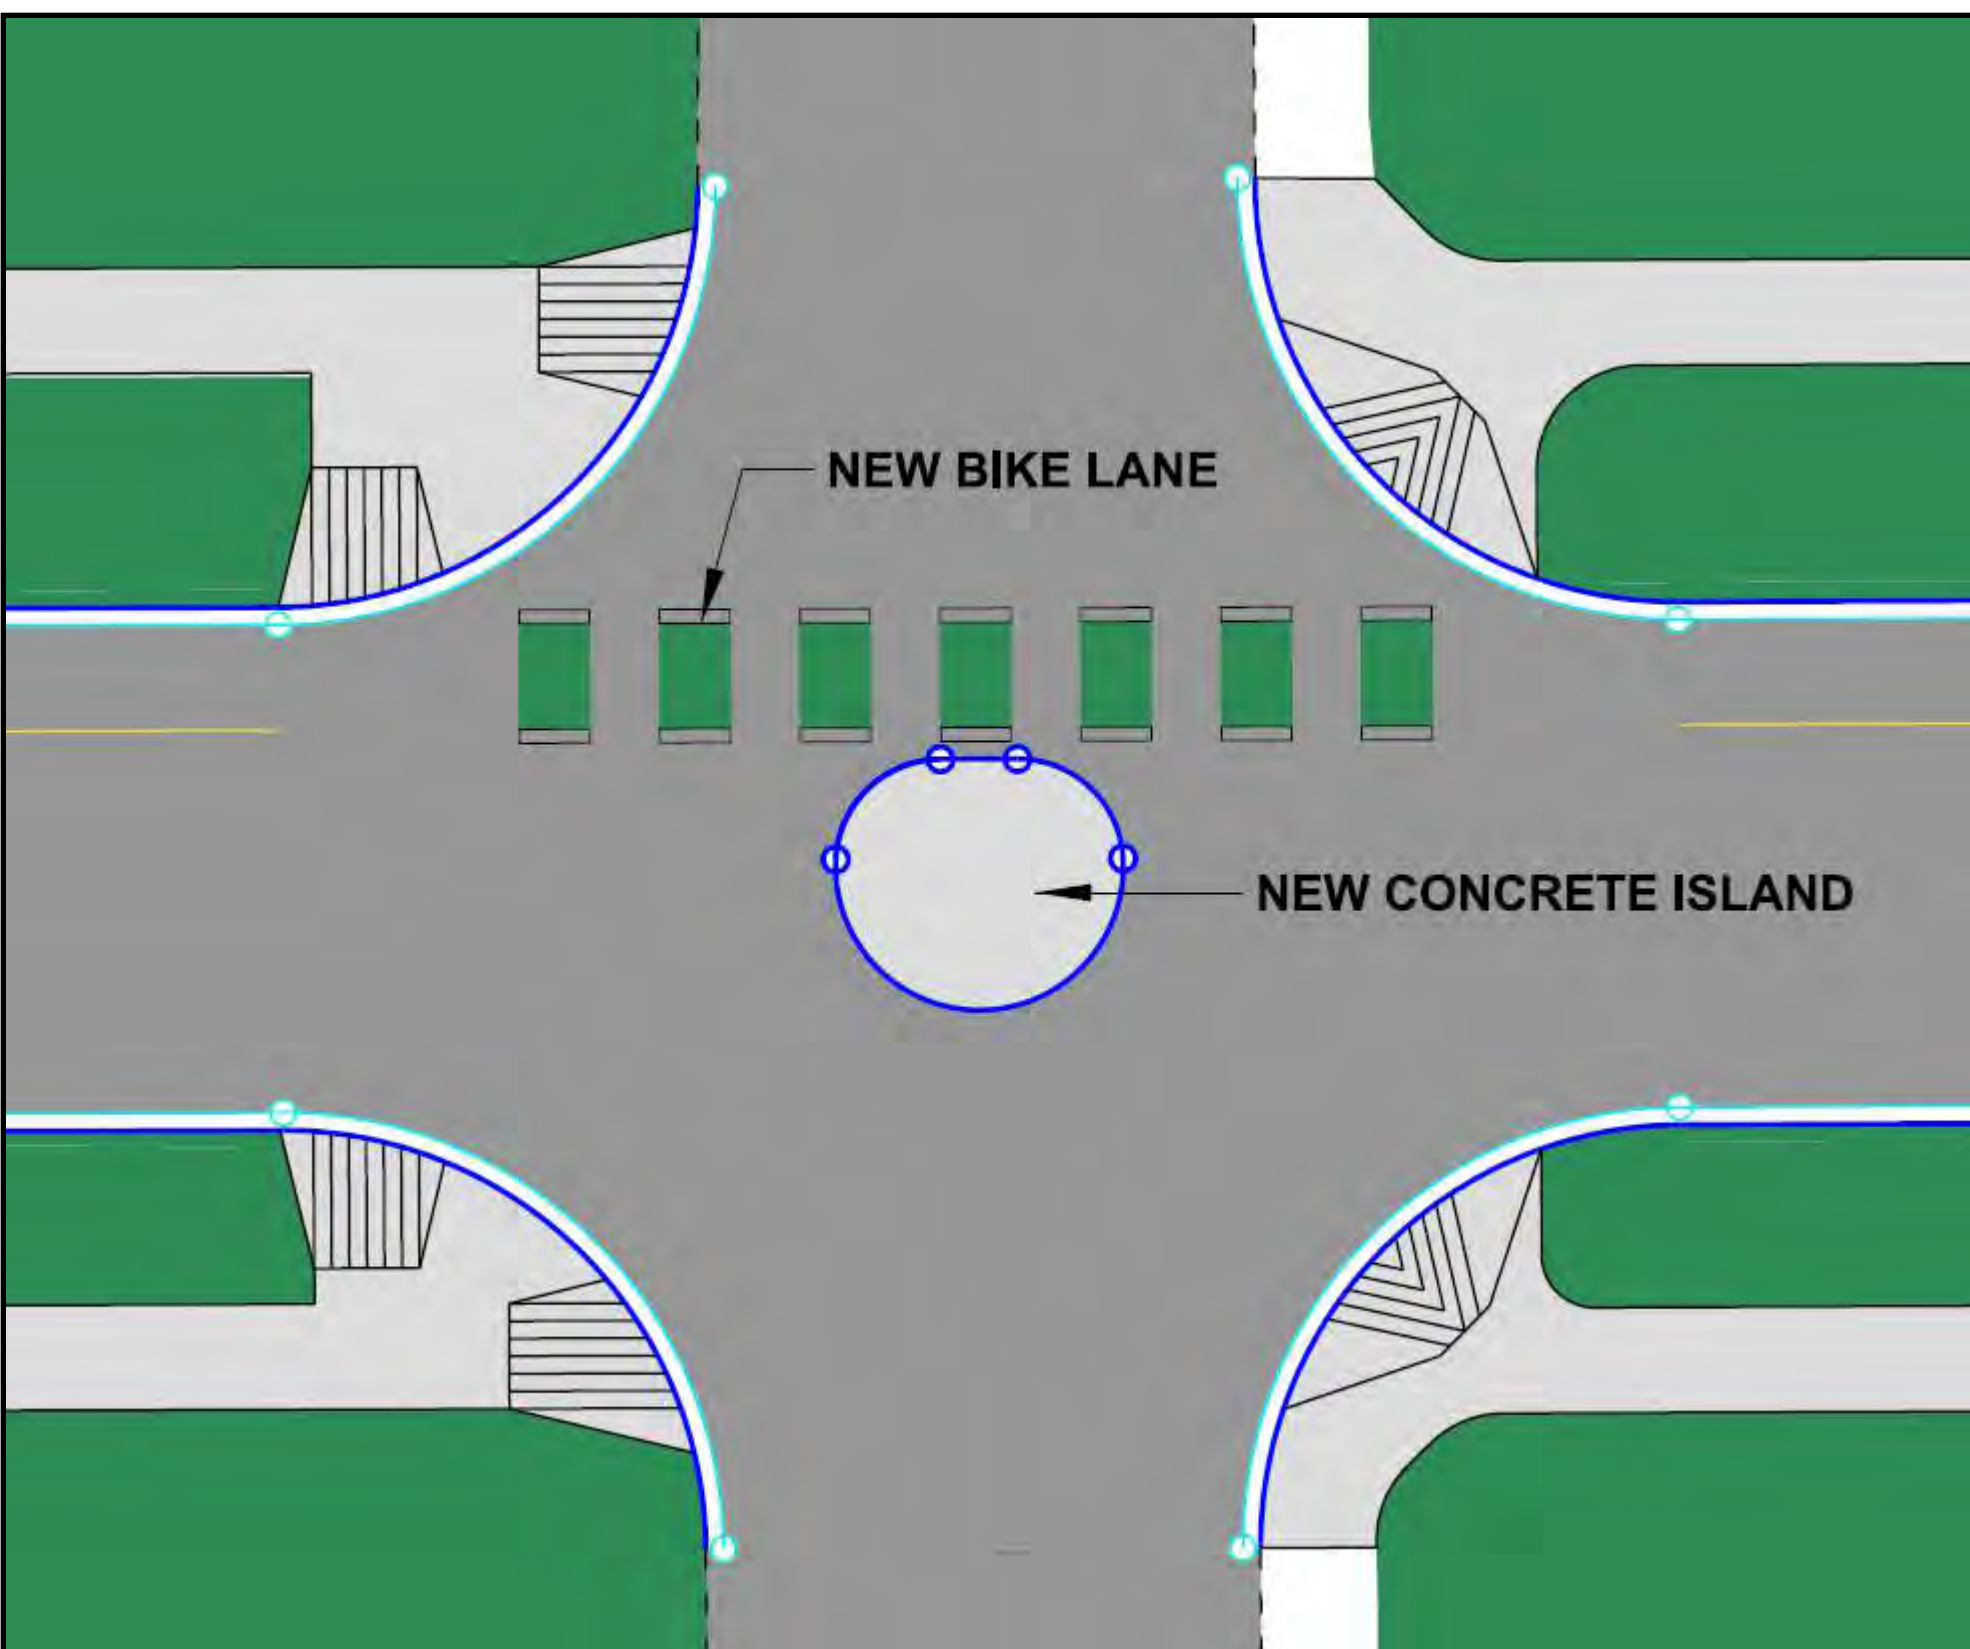

- Connects the neighbourhoods of Strathcona and Garneau to the University area
- Has high ridership for cyclists
- Includes a bicycle boulevard between 96 Street and 99 Street. Eastbound cyclists will share the road with motorists. Westbound cyclists will be accommodated in a contra-flow bike lane.
- Becomes one-way eastbound for motorists from 99 Street to 96 Street, and maintains parking on the south side
- Ties into a shared-use path at 95A Street

Construction Details

- Addition of roundabouts at the intersections of 96 Street, 97 Street and 98 Street
- Full reconstruction of the roadway
- Installation of new pavement markings
- All sidewalk reconstruction will be project cost, not cost for adjacent homeowners. Work will also include a portion of private sidewalk connectors and landscape restoration

Bicycle Boulevard

96 Street to 99 Street

- 83 Avenue is a two lane local roadway.
- The roadway will be changed to one-way eastbound, with a contra-flow bike lane for westbound cyclists.
- Existing parking will be maintained on the south side of the roadway.
- East end of the corridor will connect to a shared-use path on 95A Street.
- Every effort has been made to protect existing boulevard trees.
- Streetscape elements of the whole bike route to be determined in conjunction with 2017 construction

Construction Staging

- Construction will take part over three years and be split up into two parts:
 - 96 Street to 99 Street (2016)
 - 99 Street to 111 Street and a shared-use path connection on 95A Street (2017 and 2018)

96 STREET TO 99 STREET

- 96 Street to 99 Street to be completed in the 2016 construction season (May to September).
- While work is on-going on the street, residents are encouraged to use the back lane for access.
- During roadway reconstruction intermittent access to the front will not be permitted. Access from the back lane will be required.

99 STREET TO 111 STREET

- 99 Street to 111 Street to begin construction in 2017 and be completed no later than Fall 2018.
- A pre-construction meeting will be held for this portion of the route in Spring 2017.
