Let’s talk about Renewal and Revitalization

A Neighbourhood Story...

- Neighbourhoods are made up of people and built spaces.
- Every day people interact with these spaces.
- We walk, cycle, drive or bus to our homes, schools, roads, parks, offices and shopping areas.
- We build meaningful relationships with our family, friends and neighbours as we contribute to the sense of community within our neighbourhoods.
The City of Edmonton supports your neighbourhood story for community relationships and built spaces through two programs.

**Neighbourhood Revitalization**

Together we mobilize and support community to identify strengths, issues and priorities to create and implement a strategy that builds a more vibrant, inclusive, healthy, safe and attractive neighbourhood.

Community takes the lead on community projects, with support from the City.

**Neighbourhood Renewal**

Together we create a vision that reflects the values and priorities of a community and shapes the design and construction of a great neighbourhood.

Renewal uses neighbourhood input to design and construct the new built spaces.
