

CONSTRUCTION NOTICE

Southeast Industrial - Road Rehabilitation

Dear Property/Business Owner,

In spring 2021, the City of Edmonton will be rehabilitating the Mark Messier Trail Service Road between 156th St and Mark Messier Trail. The project includes:

- Rehabilitating the existing roadways highlighted on the included map
- Maintaining current driveways
- Maintaining a rural cross section (curb and gutter will not be added)

This project has been identified for a combination of rehabilitation methods, including a process called **full depth reclamation, and asphalt overlay**. With full depth reclamation the existing pavement and/or gravel is pulverized and treated with an oil emulsion and cement powder to become the new road base. This base is allowed to cure, and new asphalt pavement is placed on top, completing the new roadway. The other method that is being utilized is a simple asphalt overlay which consists of placing a new layer of asphalt over the existing asphalt. These rehabilitation processes are faster construction process than full reconstruction that allows for the roads to be reopened the evening after paving is completed.

Access

For most of the construction, access to your property will be maintained. Roadways may experience localized closures and access may be limited or closed as required for construction activities. The contractor will coordinate with businesses and landowners prior to construction to ensure specific access concerns are understood and limited where possible.

Construction activities will take place from May to September during the 2021 construction season. The contractor will provide more detailed notices and staging information to properties as road closures or disruption to your property are planned.

COVID-19 Impacts

APRIL 2021

INTEGRATED INFRASTRUCTURE SERVICES
CITY OF EDMONTON

While the COVID-19 pandemic has impacted nearly every aspect of daily life, it hasn't changed the fact that Edmonton is still the thriving city we love. We are continuing to build and better our city because robust and healthy infrastructure is critical to a safe and healthy Edmonton.

As part of the efforts leading up to and during construction, the City is closely following the most recent guidelines and recommendations set by the Government of Alberta and Alberta Health. Extra steps are being taken to ensure that the places where the City continues to work and build are safe, sanitary, and provide adequate space for workers and the public to maintain an appropriate physical distance.

If you have questions, please contact us at edm-admin@al-terra.com and one of the project team members will be in contact with you.

THANK YOU
